THINGS YOU CAN DO FOR  
BETTER MENTAL HEALTH

Research has proven there are five types of actions that are strongly linked to good mental health. We call these 'The Big 5' and we know that doing them regularly can help us thrive and bounce back from challenges.

We believe that everyone should know about The Big 5 — that's how big of a difference they can make to our mental health. These building blocks for good mental health are:

## 1. Meaningful Activities

Actions which give us a sense of accomplishment and satisfaction. They can be small things, like listening to a favourite song or watching a good show, and they are often fun to do.

## 2. Healthy Thinking

Having realistic thoughts about ourselves, the world and the future. This means keeping perspective and treating ourselves with respect and kindness, particularly when things are difficult.

## 3. Goals and Plans

These energise and motivate us. Planning gives us something to look forward to and stops us from dwelling on past problems.

## 4. Healthy Routines

These are the things we do automatically, like going to sleep and waking up at the same time, which set us up for the day.

## 5. Social Connections

Staying bonded to our family, friends or tribe. Regular contact with people we love and value helps us feel validated/ part of a community.
