TRIMMER MODELS

CHOOSE THE RIGHT MODEL FOR THE JOB

COLLARD®

P2200 IN ROW TRIMMER

Trims two half rows. Simple operation of vertical lift/lower and synchronised row width adjustment with the electronic joystick control.

P2200T IN ROW TRIMMER

Trims two half rows. Independent lift of RH and LH sides and function to allow synchronised operation of these. Ideal for terraced vineyards, difficult terrain and contractors.

P2200X IN ROW TRIMMER

Trims two half rows. Clear view frame gives maximum visibility in row and in transport mode.

P3200I TWO ROW TRIMMER

Trims two complete rows. Ideal for trimming large vineyards with maximum productivity.

P3200X TWO ROW TRIMMER

Trims two complete rows. Independent lift of RH and LH sides and function to allow synchronised operation of these.

SPECIAL BUILD

Collard can build a trimmer for your application. Whether it is for mounting on a harvester tractor or to suit a particular vineyard Collard have the experience to supply a product for the job. Cutting elements are modular and can be specced to any length to suit vine trellises.
