Our CAD CASTING PROCESS

DRAWING

We can CAD draw your design from a sketch, image or photograph. Or you can supply your own STL or 3DM file.

3D Printing

Following your approval of the supplied render & schematic, we will utilise leading edge printing technology to create a prototype of your piece.

CASTING

From this print, your piece is cast using our exclusive casting alloys, then cleaned & bead blasted ready for final finishing.

FINISHING

We can finish your cast piece to the high standard that is recognised of all Peter W Beck jewellery.

Stone SETTING

We can even supply and set any stones required for your design, delivering to you a fully finished piece.
