enartis

ABOUT US

Launched in 2003, Enartis has established itself as a global market leader for winemaking products and technical support. Enartis is part of the Esseco Group, a fourth generation, family-owned company, that has provided innovation and industry leadership by developing key products for inorganic chemistry and enology for nearly a century. We believe innovation is a discipline, not a cliché.

The Enartis brand is proud to have developed enduring relationships with over 10,000 manufacturers in 50 countries to provide wineries and winemakers with unparalleled innovation and expertise to improve not only wine quality, but winery efficiencies.

Truly great companies treat their employees like they treat their customers. At Enartis, our team of passionate and

engaged professionals is dedicated to working with winemakers on five continents to share their enological and winemaking expertise. Enartis invests over 2 million euros in research and development every year, leading the industry with innovative products and technical support. Long-standing partnerships with internationally respected research centers, working in conjunction with our state-of-the-art laboratories, ensure our leadership position in the enological sector. As of today, the company offers a full range of premium, specialized products developed for all stages of winemaking. The company is certified with FSSC 22000 International Food Safety Certification, is an active member of Oenoppia and is also ISO 14001, OHSAS 18001 and ISO 9001 certified.

INNOVATION

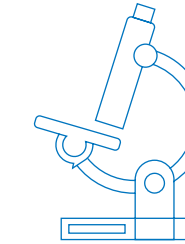

300+ specialized products

Introduced into the international market, including yeast, tannins, enzymes, nutrients, bacteria, stabilizing agents and fining agents for all winemaking stages, from harvest to bottling.

10,000+ application trials every year

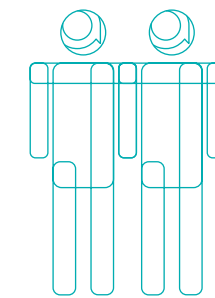

Our highly-skilled team of experienced enologists and winemakers provides an outstanding wealth of knowledge to address application problems and guarantee wines that fully express their character.

2M Euros invested in innovation every year

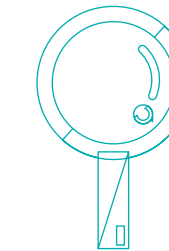

Innovation projects are developed in our five laboratories and three R&D Centers based in Italy, Spain and the USA. Here, our daily effort is to find new winemaking techniques more and more respectful of the natural quality of wine.

KNOW-HOW

200+ employees

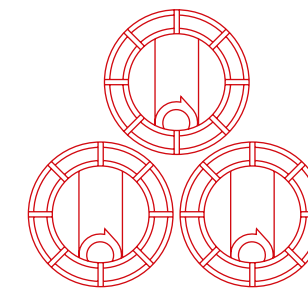

Belong to our international network who work every day to meet the needs of wineries of all sizes and guarantees an immediate and precise service due to the proximity and knowledge of the territory.

FSSC 22000 ISO & OHSAS

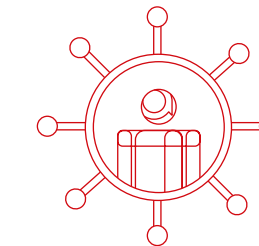

Enartis is certified with FSSC 22000 International Food Safety Certification and works in compliance with the most stringent enological and food quality regulations. The company is also an active member of Oenoppia and ISO 14001, OHSAS 18001 and ISO 9001 certified.

PROXIMITY

10,000+ wine producers in 50 countries

Enartis supports more than 10,000 manufacturers in 50 countries with innovative solutions and safe products to provide wine producers with peace of mind.

100% part of local winemaking communities

Continuously working with more than 10 prestigious winemaking associations and our internal research centers provides us the unique ability to understand the market and guarantee quick knowledge-sharing while sustaining our leadership in the enological sector.
