

**Use and repair silicone training models**

N Heydenrijk

*MedicFX*

This MedicFX workshop will be very useful for most delegates to learn how to work with and repair their products.

MedicFX silicone models are in use at a lot of first aide courses as well as with all DHB's in the country.

During the workshop they will demonstrate several ways of incorporating ready made wounds in competitions or scenarios, how to add moulage and how to suture and repair wounds during and after the training sessions.

Limited to 15 people attending per session.
