Education Network

De Mazenod Family Education Network in partnership with GoGreen Student Voice

Week 1 of our Sustainability Summit - Reducing Waste
(Monday August 26 to Friday August 30)

Schools are taking action to reduce, reuse and recycle. The focus of Week 1 is to recognize those actions and look for ways students and staff can support the initiatives and hard work the Sustainability Teams are doing.

Together, let's inspire change and make a positive impact on our environment.

WEEK 1 - REDUCING WASTE

Action

Use Homeroom, Assembly or Pastoral Care time to spread the message - We all need to respond and take action. What opportunities do we have in our community to Reduce, Reuse or Recycle? During Week 1 remind students and staff via bulletins, newsletters, Learning Management Systems and message boards of programs already in place at your school; what programs could be introduced, and how everyone needs to actively support actions designed to make our communities more sustainable.

If you have a video clip or an electronic display highlighting the action at your school, and you would like it to be showcased in Week 4 of the summit please send it to tcoghlan@omi.com.au

During Week 4 (October 7 to October 11) we would like to use our gallery on the GoGreen Student Voice Website for students to understand what other schools, social enterprises and corporates are achieving to reduce, reuse and recycle.
