Making Taupō a People Centric Town

Turning a long-term reality

Objectives

Spaces that provides flexibility for activation and events while maintaining street functionality

Blurring the boundaries and providing connection between the Town Centre and both the Lake front and Tongariro Domain

Still allowing access to all areas with all modes to maintain servicing and property access

Creation of more outdoor dinning and street trading opportunities. Creating well designed space acts as a catalyse for private development

Expand lakefront prescient to create a destination for people that is distinctive and world class in quality and offering

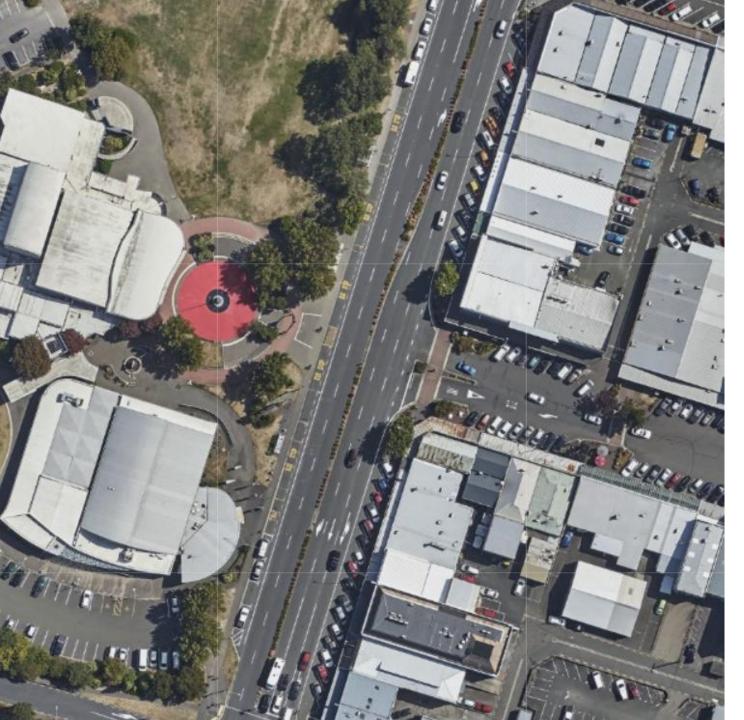

Key Project Challenges

- Designing while building
- Pedestrian Mall Consultation
- Parking and Truck Access for Businesses
- Cliff edge treatment Safety and Erosion
- CIP funding Constraints
- Covid supply issues and Lockdowns
- Change Management

Tongariro Street Key Problems

- Four lane road a significant barrier as pedestrian.
- Disconnected
 Shopping/dinning areas
 from public spaces
- No cycling connection from The Great Lake Shared Path to the North

Tongariro Street

Before

Roberts Street Key Problems

- Outdoor dining is low
- Reserve / public space was cut off between parking/road and Lake Terrace (ex SH1)
- Minimal Outdoor Dining Area

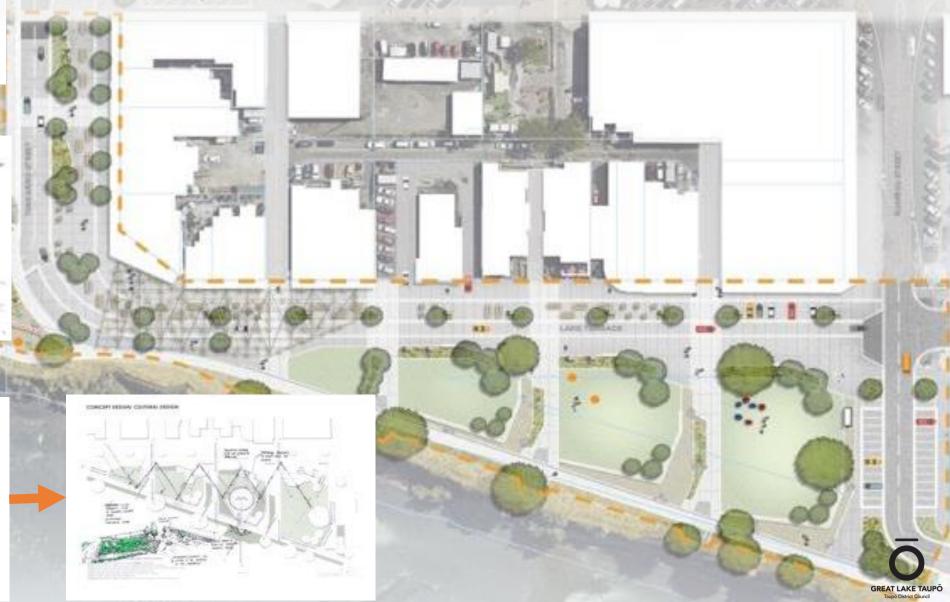

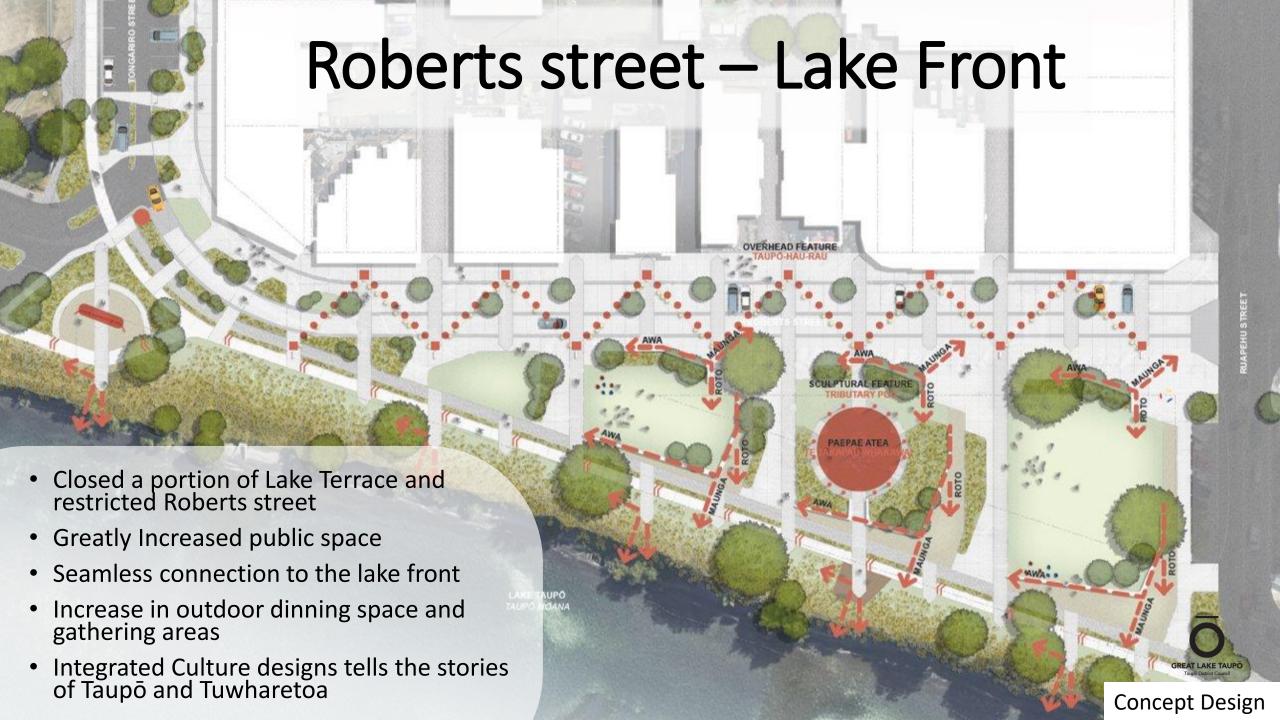

Roberts street – Design Process

Roberts Street

Lessons Learnt

- Having local consultant who can turn up to site was invaluable
- Weaving the cultural elements into the project early
- Have a dedicated stakeholder engagement person/team was critcal
