

Decarbonising Transport

Transportation
Conference

9–12 May 2021
Hilton Auckland

Decarbonise the New Zealand transport industry – finding opportunities and constraints

What do you think are the opportunities and constraints to decarbonising transport in our industry? An interactive standing design charette.

Each day we will post a high-level decarbonising transport themed question on a poster at the Standing Charette table located in the Exhibition. These same questions will also be posed on the event app. We would like everyone at the conference to write ideas/examples of the daily theme and the opportunities and constraints you see relating to your example. We want everyone to get involved, so even if you do not have an idea yourself, there will be stickers for you to add comments, thumbs up, etc.

The Auckland Transportation Group committee wanted to do something different with this year's conference. Although the presentations are always inspiring the committee got thinking about how to make the most of so many great minds being in one place at one time and how we could use this conference to collect industry ideas that might have a meaningful outcome.

High-level decarbonising themes we have for the three days are:

1. Industry (employment) position / role
2. Policy/ legislation/ budgets
3. Design guidelines and processes
