

Programming Tool

Insightful solutions.
Empowering advice.

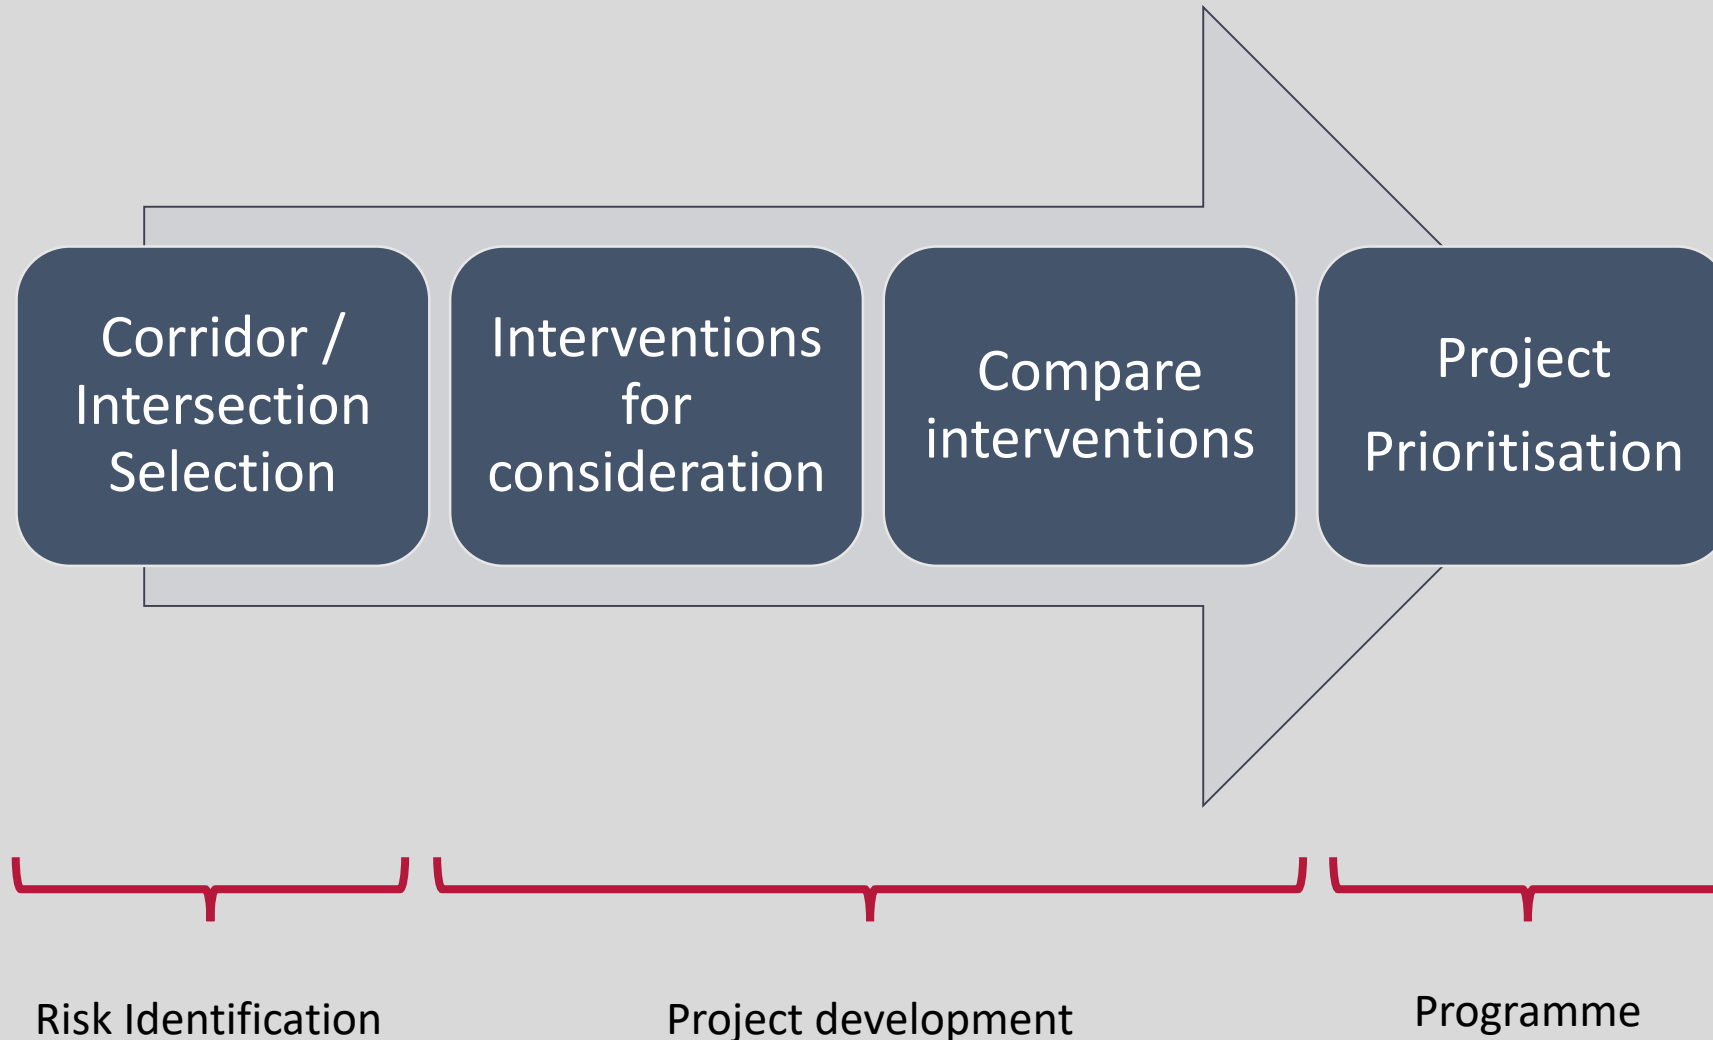

Why?

Challenges faced by many road controlling authorities

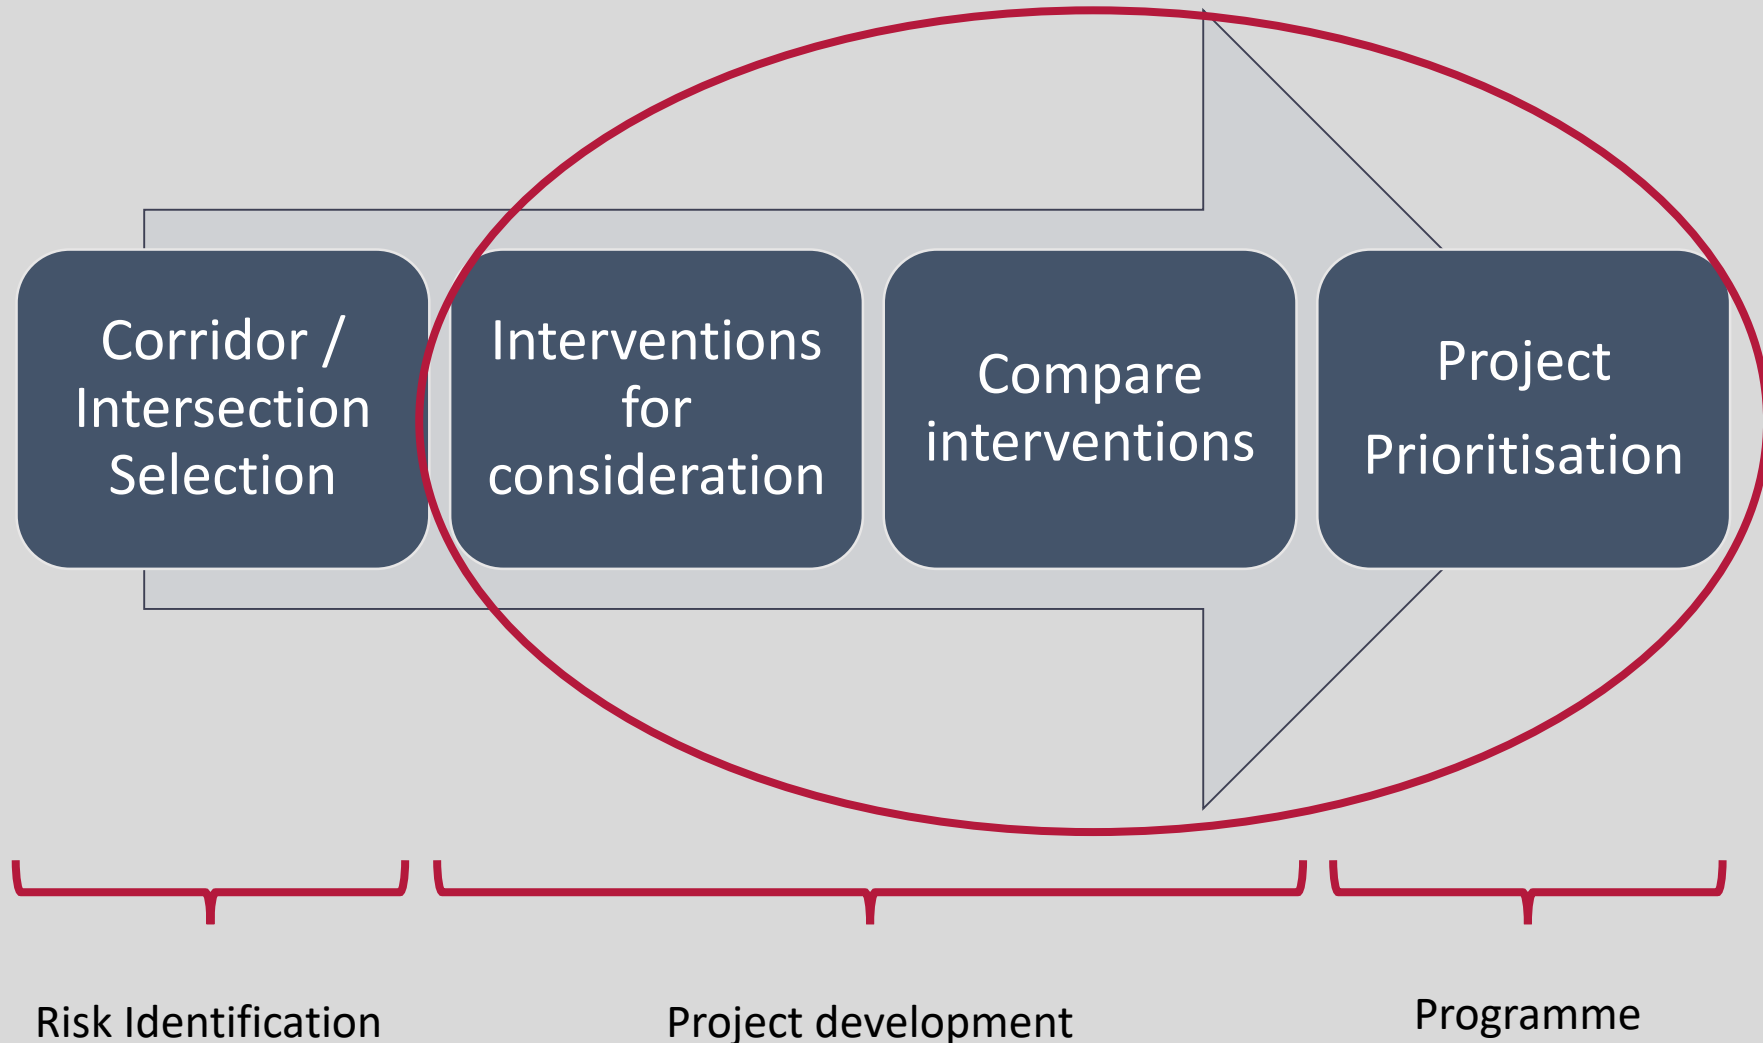

- Limited resources.
- Intervention planning can be a laborious task.
- Wearing many hats.

Safety Programming Tool

This tool analyses crash statistics on road sections and suggests possible safety treatments

Add Projects Saved Programmes

Select a saved programme:

Carl Test

Adjust the programme budget value below, then prioritise by either BCR, DSI Saved per KM, DSI Saved per Dollar Spent or DSI Saved per VKT. The total activity cost represents the sum of all projects saved to this programme.

Programme Budget	\$25,000,000
Total activity cost	\$46,038,000

Prioritise by:

DSi saved per VKT

8 out of 11 projects fit within the programme budget when prioritised this way.
