

Integrated Transport Assessment guidance – is it working?

Waka Kotahi are currently reviewing available Integrated Transport Assessment (ITA) guidance. The existing Waka Kotahi PPM ITA Guidance is out-dated (2007) as is other subsequent guidance/research which does not reflect recent policy changes such as the Emissions Reduction Plan and Vision Zero. This review is seeking to update guidance to reflect recent changes in industry, supporting a step change away from focusing on vehicles towards better multimodal and sustainability outcomes and expanding the guidance from being focused on State Highways to all roads. We are currently consulting with industry on this research.
