

# NATIONAL CATCHMENTS FORUM 2022

OCTOBER 6/7, 2022

Museum of New Zealand  
Te Papa Tongarewa  
**WELLINGTON**

## Programme

**The NZ Landcare Trust (NZLT)**, established in 1996, is celebrating 25 years as one of the leading independent organisations working across New Zealand. The Trust works directly with rural land users to support sustainably run farms, local stewardship of land and water resources and connected communities. A dedicated team of catchment coordinators with ecological and farm system expertise currently provides extension support to over 100 catchment groups across the country.

**The Ministry for Primary Industries (MPI)** is the lead government agency for the food and fibre sector in Aotearoa New Zealand. Working with businesses, farmers, fishers, foresters, growers, manufacturers, and processors, MPI is responsible for regulatory systems that underpin food safety, forestry, biosecurity, and fisheries. The ministry also plays a key role in helping to reduce the sector's environmental footprint and is partnering with catchment groups, farmers, growers, and regional councils to restore the health of our freshwater systems. This includes an investment in a national integrated farm planning framework, which will help to ensure up to 40,000 farmers and growers improve on-farm performance and meet consumer, market, and environmental needs.

**The Ministry for the Environment (MfE)** is the national adviser on a range of environmental matters and the long-term steward for the environment. This mandate is underpinned by the aspiration of making New Zealand the most liveable place in the world. The ministry is making significant investments in catchment management, biodiversity conservation and freshwater policy reform.

The purpose of this forum will be to share knowledge and experiences in catchment management, build new partnerships, discuss pressing issues that farmers and landowners are facing and showcase innovations that will inspire, connect, and celebrate our journey. This event is aimed specifically at catchment group leaders, group members and farmers, iwi, rural professionals, agribusinesses, resource management agencies, among other stakeholders.

Nou te rourou  
Noku te rourou  
Ka ora ai te Iwi

With your food basket  
And my food basket,  
The people will thrive.
