Corresponding Facilitator's Email: Rosalie.goldsmith@uts.edu.au

OVERVIEW OF WORKSHOP

The AAEE Winter School and the HDR Symposium provide networking opportunities for those new to Engineering Education. Winter School participants have indicated that they would like to be able to continue their discussions beyond the five days of the Winter School, and this reunion will provide a structure for re-connecting and extending their networks.

ACTIVITIES

Participants will have an opportunity to share their current engineering education research journey and plans with each other through informal discussion. The facilitators will draw on the research interests in the room and provide opportunities to discuss potential collaborations amongst the participants. Participants will continue to build their networks and collaborations in engineering education research.

TARGET AUDIENCE

This session is only open to AAEE Research School and AAEE HDR Symposia alumni, and is especially targeted at those from recent years

OUTCOMES

We expect that this workshop will facilitate the strengthening of established networks through re-connecting with Winter School colleagues, and extend these connections. It will provide HDR students with an introduction into the AAEE emerging engineering education academic community

KEYWORDS

Winter School, networking, belonging

PRESENTERS' BACKGROUNDS

All presenters facilitated the 2024 AAEE Winter School.
