

1. Types of health outcomes resulting from flood exposure (number of studies on each outcome)¹

2. Case study: Flood hazard zones and school locations in Porirua²

¹ Systematic mapping of 56 articles on long-term flooding impacts from a variety of countries. Authors note that further cohort or longitudinal research focused on disability, chronic diseases, relocation population, and social interventions after flooding, are urgently required. Source: Zhong S, Yang L, Toloo S, et al. The long-term physical and psychological health impacts of flooding: A systematic mapping. *Sci Total Environ.* 2018;626:165-194.

² Flood hazard zones show 1-in-100 year flood extents, accounting for 100-year climate change impacts. Source: Mason K, Lindberg K, Haenfling C, Schori A, Marsters H, Read D, Borman B. Social Vulnerability Indicators for Flooding in Aotearoa New Zealand. *International Journal of Environmental Research and Public Health.* 2021; 18(8):3952.
