

Hello Health – Building an EMR Together

Overview:

How would the ideal EMR help to improve your processes? In a first for Australian GPs Hello Health will listen to your feedback on what technology and features suit your unique & evolving needs. Be at the forefront of the creation of a new EMR purpose built for you.

Abstract:

The RACGP has recently collaborated with Hello Health to provide Australian GPs with the opportunity to voice their needs and concerns surrounding EMR, practice management and patient portal software. In this highly interactive session Hello Health will be listening and providing you with the opportunity to be a part of the development of a new type of general practice software.

With over 10 years of experience in the US market, Hello Health has built a platform that is secure, convenient, and suitable for the general practice environment. Now, Hello Health wants to consult with RACGP members for suggestions on how to build the most relevant and supportive software system for the Australian GP.

Throughout GP18 you can experience the Hello Health platform and engage with their team to learn more about this dynamic platform that will be purpose built for the Australian GP landscape. Hello Health is here to listen to your thoughts on EMR and practice management technology as well as the current and future needs for a 'Healthy Future' for all Australians.
