**Biomarker Session: APSC
Consensus & Future Use Case
in Diabetes Mellitus and
COVID-19**

Date: Friday, 31st July 2020

Time: 12:00-13:30 (GMT+8)

Singapore

Time: 13:00-14:30 (GMT+9) Japan

APSC Consensus Recommendations for the assessment of suspected ACS patients in the emergency department (ED), using high-sensitivity Troponin T (hs-TnT).

Implementation of the 0/1-hour algorithm in Australia: The Real-World Study - RAPID-TnT.

Watch what Dr Derek Chew (member of the APSC Consensus Expert Committee, and a RAPID-TnT investigator) has to say about the early rule out of AMI for suspected ACS patients in the ED.

Other topics of discussion include:

The role of NT-proBNP in T2DM patients - the ADOPT study

COVID-19 Serology Tests - The Evidence & Future Use Case

Find out more about the APSC virtual session and register now.
