

SPONSORSHIP

The opportunities

We are delighted to invite you to sponsor the International Symposium on Green Transformation of Carbon Dioxide (ISGTCO2), to be held in Brisbane, Australia (Nov 29 to Dec 1, 2023), hosted by the Australian Research Council Centre of Excellence for Green Electrochemical Transformation of Carbon Dioxide.

Cooperating on a global opportunity, this 3-day Symposium gathers a critical mass of expertise to tackle the world's biggest challenge – carbon dioxide. The Symposium brings together leaders from research, government and industry from Australia and around the world to build key collaborations.

The Symposium will attract over 150 delegates comprising scientists, engineers, postgraduate students, policy makers and industry

stakeholders to collectively discover new ways to tackle challenges in decarbonisation and CO2 conversion.

As a Sponsor, you will be targeting experts in CO2 capture and reduction technologies, including electrochemistry, catalysis, functional materials, catalysts, membranes, materials synthesis and characterisation, reactor design and manufacturing, computational simulation and modelling.

Your involvement in the Symposium will promote your organisation on an international stage, and contribute to accelerating global progress toward net zero targets.

GETCO₂

PLATINUM - \$10,000 (one available)

- Recognition by the Chair as Platinum Sponsor in the Opening Plenary
