

## Improve patient outcomes and efficiency using your EMR data

Over 20,000 Ontario clinicians and their staff are using electronic medical records to deliver care to more than 11 million Ontario patients. Clinicians know that data improves patient outcomes.

For 15 years, OntarioMD has been a leader in and trusted advisor on digital health solutions that deliver more efficient and effective patient care.

Our award-winning Insights4Care (i4C) program is available to all certified EMR users, and it's transforming health care delivery through digital health technology that is driving patient-centred care.

For busy clinicians, i4C saves time and resources in managing a busy practice.

## Take your EMR to new heights through OntarioMD's i4C Advisory Service

Through EMRs and integrated digital tools, clinicians can enhance patient care and workflow by accessing and making the most of the quality data at their fingertips.

OntarioMD's i4C Advisory Service is available to all users of OntarioMD-certified EMRs to provide coaching to clinicians and practice staff as well as hands-on practice support to ensure clinics are getting the most out of their EMR.

Our team of expert users have first-hand experience in practice workflows, digital health technology and change management.

### Our coaches can help you:

- Use your EMRs to generate reports and patient reminders for targeted patient care
- Enhance patient workflows using your EMR
- Strengthen data quality through your EMR to improve patient care
- Dive deeper into data using the i4C Dashboard
- Explore other effective integrated digital tools

*"To have somebody who's walked that road before you, and then allow them to lead you into that area, that was a big value-add for us."*

*- Dr. Ken Gamble, Family Physician, Toronto*

# Unlock your EMR data to improve outcomes for patients

OntarioMD's user-friendly i4C dashboard makes it easy to unlock patient data in your EMR.

Gain better insights about your patients using real-time EMR data to generate reports on individual and population health using 30 indicators, which include chronic conditions such as diabetes and obesity.

Understanding your EMR data helps you be proactive with your patients and leverage the data for better patient outcomes. The data can help you make improvements to the way you manage preventive care and chronic diseases.

## With just a few clicks, the i4C dashboard can:

- Display relevant EMR data in a quick, easy-to-scan graphic, allowing you to take action
- Scan for key indicators such as diabetes, obesity, immunizations, prescribed opioid use, and smoking status – across your patient population and for individual patients
- Identify trends and compare population health within one clinic with other clinics that are also using the Dashboard

87% of i4C Dashboard indicators recorded improvements after only 90 days of use

*"I have found the OntarioMD i4C Dashboard to be a very helpful resource. The Dashboard enables, with a few clicks, chart audits on my entire practice for many quality indicators."*

- Dr. Meghan Davis, Hamilton

## Access i4C right away!

The i4C Dashboard is currently available to TELUS PS, YMS EMR, Accuro® EMR and Aware EMR users, with more OntarioMD-certified EMR vendors offering it in future.
