

4PS SOFTWARE

An efficient cost effective Safety & Compliance software solution for SMEs

By using 4PS Software, your business information is accessible from anywhere there is an internet connection. Rest assured your information is always up-to-date and kept in one central location, eliminating the need for multiple systems, licences and archaic spreadsheets.

4PS Software has the ability to:

- Deliver efficient and accurate rostering of people and plant across projects
- Send alerts of training or compliance expiries well in advance
- Store all training and plant compliance records and self-generate a comprehensive matrix of real-time information
- Systemise your plant maintenance records, scheduling, notifications, and history
- Provide project managers with all the necessary information to successfully plan and execute a project
- Reduce unexpected delays as all equipment and employees can easily be identified as compliant for any planned on-site work

The features and benefits of the 4PS Software system are innovative and utilise cutting edge technology to ensure you can manage your business' safety and compliance more effectively and efficiently than ever before.
