

PTWs and the Safe System

What new contexts does our vision demand?
 What new perspectives?
 How shall we arrange mobility in our vision for PTW use?
 What new strategies and structures shall we start?

What information is needed for a systems approach to PTW safety?
 How can we open up system information to all?
 How can we use this to coalesce multi-sector will and collective influence?

What is the current state of PTW safety?
 How has this come about?
 What role do PTWs fill for us?

What is our picture of future PTW use?
 How are the parts working?
 How would this make a difference?

What issues face our vision for PTW use?
 What are the contradictions?
 What limits constrain our achievement?

How must agencies and stakeholders be with one another?
 What sort of relationships and connections do we need?
 Who or what needs to be connected?

What operational principles or ground rules need to guide our strategies and actions?
 What principles need to guide how we engage others?
