

## Frank van Steenbergen

Technical Director  
MetaMeta

**Dr. Frank van Steenbergen** has worked extensively in the field of green roads in collaboration with various organizations such as the World Bank (WB), and the Asian Development Bank (ADB) among others. For the ADB, he among others contributed to the decarbonization strategy for the Transport Sector. For the WB, he was the key author of the flagship publication "Green Roads for Water: Guideline for Road Infrastructure in Support of Water Management and Climate Resilience." This is building on more than 10 years' experience in Green Roads programs.

His firm MetaMeta Research, now part of the GOPA group, has worked on path-breaking program in infrastructure, resource management and productive land use and been the winner of two recent international awards. The work on Green Roads for Water is available at [www.roadswater.org](http://www.roadswater.org)

He is also a member of the Asset Management Committee of the IRF. He led a pathbreaking study on the inclusivity aspect of feeder roads in Africa. An applied geographer by background, he combines high-level policy work, and capacity building with supporting activities on the ground.
