

BEFORE

ACCESS FOR SAFE WATER

REJUVENATING RESOURCES

To support the municipalities for improving the lives of the people through easy and safe access to their natural water resources, Environment and Public Health Organization (ENPHO) in partnership with Bremen Overseas Research and Development Association (BORDA) and in close collaboration with Godawari and Kirtipur Municipalities renovated and rejuvenated five traditional stone spouts under “Intergrated Urban Water Management at the Center of Municipal Public Services”, project from January to December 2020. The action aimed to ease the water-stress prevalent among the people living in the municipalities.

For the activity, ENPHO coordinated with local stakeholders of the municipalities to identify, renovate and rejuvenate five traditional stone spouts. The renovated traditional stone spouts are **Pooring Gaa Hiti**, **Pako Hiti** and **Sheraphata Hiti** in Godawari Municipality and **Bharkhe Hiti** and **Aajudega Kuwa** in Kirtipur Municipality. This action served total **405** HHs with individual beneficiaries of **120** by **Pooring Gaa Hiti**, **900** by **Pako Hiti**, **210** by **Sheraphata Hiti**, **675** by **Bharkhe Hiti** and **225** by **Aajudega Kuwa**.
