

Water Purification for Drinking Water

About Us

OCEO is making drinking water intelligent, sustainable, and affordable. Deteriorating water quality and its rising cost is one of the biggest global problems. We saw a huge opportunity to build a sustainable business with OCEO Smart Water Purifier.

OCEO digital solutions have the power to engage with consumers more closely than ever before, save billions through operational efficiencies, improve service levels and reliability, and map water quality data for social good. In the near future, we aim to make consumers, stakeholders, and regulators view water as more advanced than energy.

Our impact goes beyond water access by employing local people, reducing CO2 emissions, generating new opportunities, and promoting sustainable development. The co-creation of the future water experience is at the forefront of all of our partnerships (joint development, distributions, and white labelling). We aim to take innovations to the world and build a better world, drop by drop.

Our Solution

OCEO is leading the revolution of water purification as a service in the drinking water industry. OCEO is a first of its kind IoT-enabled smart water purifier that gives you healthy water right in your home without having to buy the device or pay a maintenance fee. You only pay for the water purified from the machine. We call it Water Purification as a Service (WAAS).

Our winning solution emerged as the winner of the India-Israel Innovation Challenge for Innovation in Drinking Water. It received recognition from the Prime Minister of India Shri Narendra Modi and the Prime Minister of Israel Mr. Benjamin Netanyahu.

Meet OCEO

- Smart Purification**
Intelligent Dual Purification System
- Smart Connection**
Measure & Monitor every water drop
- Smart Ownership**
Unique Pay Per Litre Model
- Smart Dispensing**
Smart Sense for non-stop purification
- Smart Maintenance**
Quick & Easy DIY Filter Replacement

Interactive Session

25 October, 2:00–2:30 p.m.
(GMT +8, Manila time)
