

## Koen van Baekal

Director  
Rebel, Zeroca

**Koen** works as financial and strategy advisor across infrastructure and mobility sectors in both emerging markets and developed countries. He has a strong profile in the analysis of business cases, commercial and financial structuring, procurement strategies and preparation for tender, delivery and management of strategic investment projects. His work in e-mobility and climate finance includes various BEB-based BRT projects, fleet/country and regional studies for the transition to e-mobility, supporting the development of transport decarbonization guidelines for the Green Climate Fund, as well as financing of several battery-electric and H2-electric transit concessions in The Netherlands and Belgium.

Further to his advisory role, Koen works as co-founder of Zeroca, supporting carbon credit development for e-mobility fleet and infrastructure manufacturers, operators and asset-owners worldwide. He is also director and co-founder at Rebel Automated Shuttles, a venture of Rebel that operates various autonomous electric shuttles and buses in last-mile transport in The Netherlands.
