

MEGHDOOT™

Make-In-India Water Solution developed by Maithri Aquatech for the World

World's First Atmospheric Water Generation (AWG) solution with Customised Mineral Dosing developed in partnership with Indian Institute of Chemical Technology (CSIR-IICT)

Water Quality which goes beyond World Health Organisation (WHO) standards and Indian Standards (IS) of drinking water quality

Purest Water, From Air; Never touches the ground.

Approved by India's Water Ministry - the Ministry of Jal Shakti by the esteemed Mashelkar Committee

Key Benefits

Intrinsically Sustainable by Nature

+Water-Positive

+ Zero Direct Carbon Emissions

+ Dependable

+ Perennial

+ Last-Mile Connectivity

+ Reduced Plastic Usage

100% Clean Water

**Environmentally -
Friendly**

**Renewable Energy
Compatible**

**Hassle-Free
Maintenance**

Rapid Deployment

Extremely Scalable

IoT Ready

Economical

Key Projects – 1

Key Projects – 2

100 million litres
of water from air generated.

200 million litres
of precious and scarce water saved.

Converting Net Consumer to Net Producers of Water.
