Why automated reserves management system is important?

- ❑ Limited list of eligible financial instruments:
 - ❑ Money Market deposits
 - ❑ US Government Bonds and T-Bills
 - ❑ Eurozone Countries Government Bonds and T-Bills
 - ❑ BIS securities (FIXBIS, MTI's)
 - ❑ FX spot operations
- ❑ High risks
 - ❑ Operational Risk
 - ❑ Low Process Efficiency
- ❑ Lost revenues
 - ❑ Buy and hold approach
 - ❑ One single portfolio
 - ❑ No benchmarks
 - ❑ Absolute return approach

Reserves Management System Implementation – NBG experience

Before Implementation

- ❑ Separate systems used in reserves management
 - ❑ Excel
 - ❑ SWIFT – Manual work
 - ❑ BARS accounting
- ❑ A lot of manual work and paper documents
- ❑ Limited number of instruments

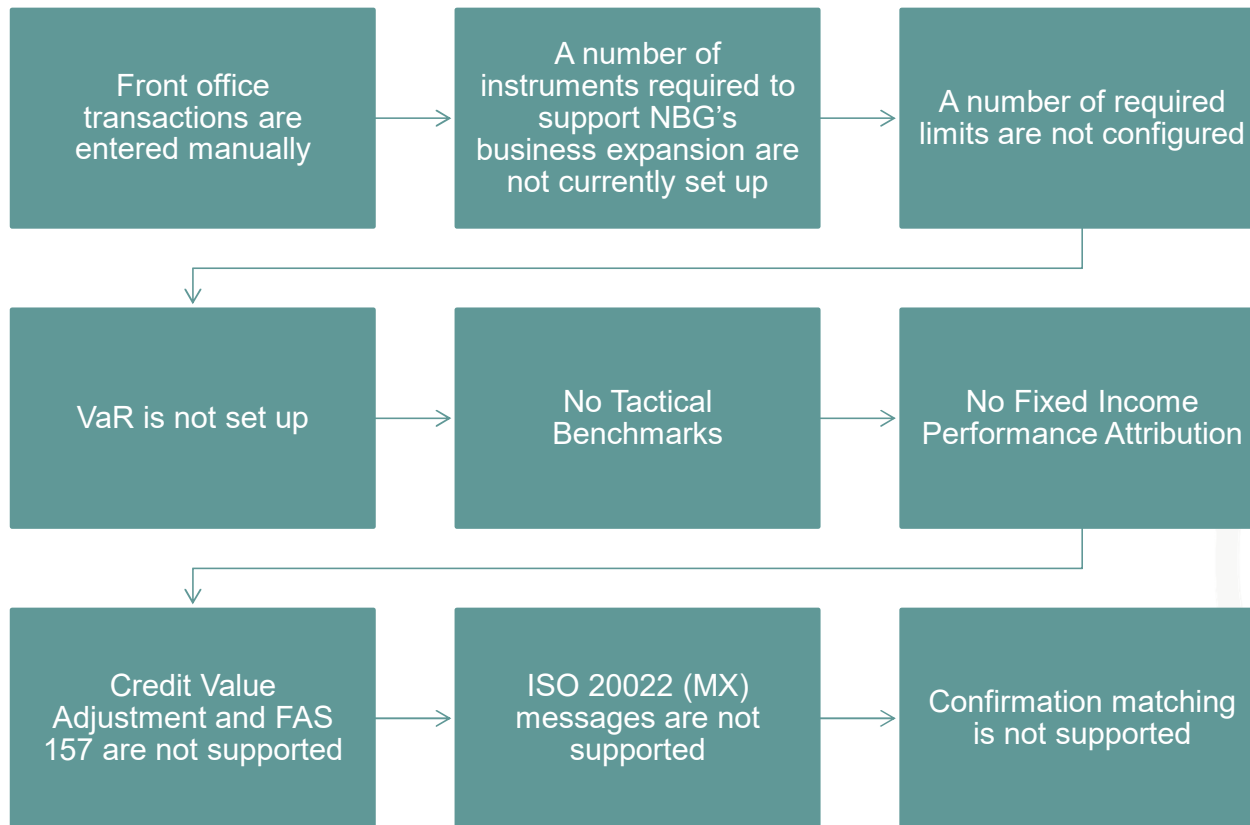

Reserves Management System Implementation – NBG experience

First System-General Functional Requirements

- List of required financial instruments
- Pricing and analysis of the financial instruments
- Portfolio management functionality
- Credit risk analysis
- Performance attribution
- Transaction management (import, entry, trade tickets etc.)
- Cash flow forecasting and liquidity management
- Integration with SWIFT
- Generating Accounting Entries

Key challenges to current landscape – Wallstreet Suite v7.3

Observations:

Key differences and upgrades– Wallstreet Suite v7.4

❑ Front Office

- ❑ Standard Wallstreet Suite Interfaces and ION gateways to external trading platforms
- ❑ New Instruments
- ❑ Additional key-figures

❑ Middle Office

- ❑ Improvements in valuation & market data
- ❑ Additional limits
- ❑ Value-at-Risk
- ❑ Tactical benchmarks
- ❑ Fixed Income Performance Attribution

❑ Back Office

- ❑ Cash Collateral
- ❑ ION confirmation matching
- ❑ Netting rules
- ❑ FIN Message actions
- ❑ Additional SWIFT messages
- ❑ Support for CBPR+ ISO 20022

❑ SMD

- ❑ Standard SDM flow in all SDM enabled editors

❑ Accounting

- ❑ Credit Value Adjustment and FAS 157

System description

Business Coverage in Wallstreet Suite

Front Office

- Trade Simulation (Pre Trade Analysis)
- Trade Entry - Bloomberg
- Limit Checks
- Rate reasonability check
- Cash flow Analysis
- Positions/Holding Monitoring

Middle Office

- Positions Valuation
- Risk Figures Monitoring
- Real time Limit Monitoring
- Benchmark Management
- Performance Measurement

SMD

- Static Data Management (4 eyes principle)
- User management

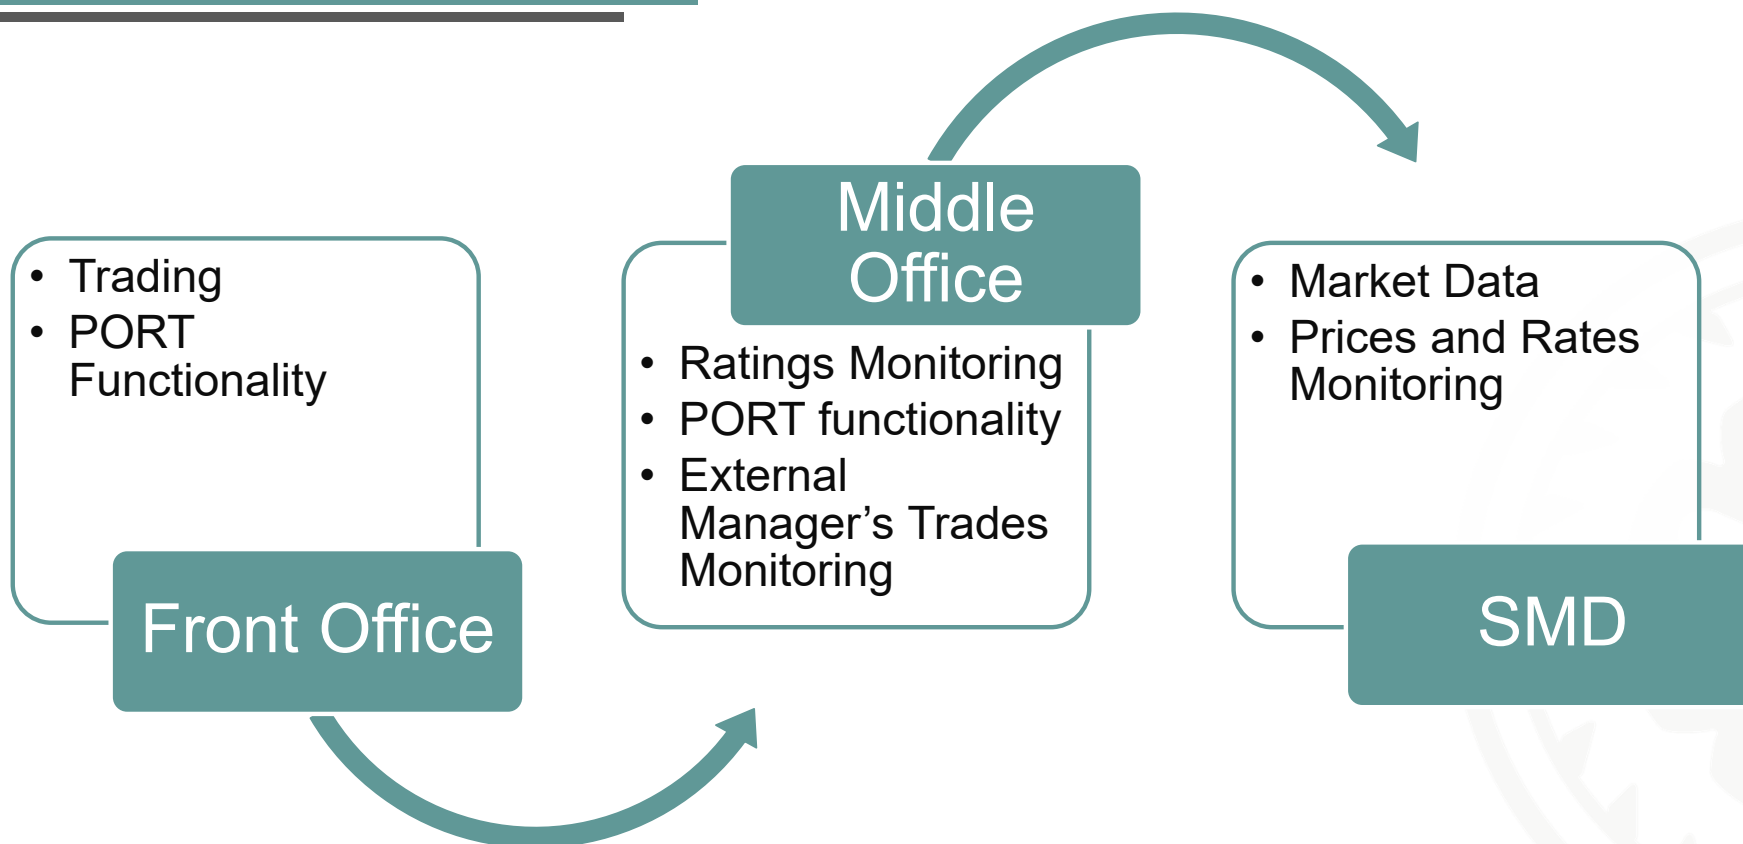

Back Office

- Transaction Verification
- Confirmation Matching
- Reporting
- Cash Management
- Nostro account reconciliation
- Holding reconciliation

Accounting

- Generate Accounting Entries
- Accounting Static Data Management (4 eyes principle)
- Accounts Management
- Accounts Mapping

Functions by Units in Bloomberg

SWIFT

Back Office

- Incoming and Outgoing Transactions in Foreign Currencies for NBG and Clients
