

Adrian Sammons

ADB TA Consultant
Development of Green Ports and
Green Shipping Project

Adrian has over 30 years' experience in transport and logistics. In 2005 he established a transport economics consultancy – 'AMSTEC Limited, which has completed transport related projects worldwide.

Adrian holds an MBA from Middlesex University London and is undertaking doctoral research on Port privatisation. Development in maritime transport and ports have been a significant speciality of Adrian's career and he has successfully completed over 60 projects, many in the Asia-Pacific region. These have included port master-planning, port reform and research for green transformation for maritime transport. This work includes decarbonisation of shipping and port operational sustainability featuring environmentally friendly and sustainable operations and technology. Adrian's working career involved postings in London, Singapore, Melbourne, Auckland, Adelaide, Darwin, and Sydney where he was CEO of international shipping lines. In the early 2000's, Adrian was chairman of international shipping consortiums where he was instrumental in leading global shipping policy reform and commercial strategies. Publishing academic journals, Adrian has jointly won on two occasions the International Assn. of Maritime Economists (IAME) award best original maritime research paper.

The Korea Association of Maritime Industry awarded Adrian an outstanding achievement award for published research and the Australian Naval Institute awarded Adrian a certificate of merit for research & development of ports and shipping industry.
