

Clear Aligners: An Introduction to IPR, Placing Attachments and Compliance Monitoring.

When broken down, Clear Aligner treatment is simply a series of well executed steps that allow us to provide patients with beautiful, healthy smiles without the need for braces. In this workshop, Dr John and the AORTA team will comprehensively cover everything you need to know about IPR and attachments including hands on demonstration and what you need from your indemnity insurance to ensure you are safe and proficient. The team will also go through the secrets of getting and maintaining good patient compliance to ensure successful treatment.
