

## **Crestron Breakfast Workshop: Technology for flexible learning spaces**

A discussion about today's demands for technology to suit the rapidly evolving meeting & learning space. We will address how Crestron has positioned itself to meet the needs of the hybrid teaching space and meeting rooms of any size with technologies and sound partnerships with Microsoft & Zoom. We take a look firstly at the type of solutions per space and then an overview of our XiO Cloud management portal, which provides scalability and allows for End Users and Integrators to be prepared for future changes with remote deployment, management and upgrades.
