

We highly recommend using **DB Schenker Australia**, as their comprehensive service includes a door-to-stand delivery, including weekend and outside of normal business hours.

DB Schenker Australia has been appointed as the official logistics contractor for MilCIS 2024.

DB Schenker can arrange all local, interstate and international transport services including delivery onto each exhibitor's stand at the National Convention Centre Canberra. If you are an exhibitor not located in Australia, DB Schenker can provide comprehensive freight forwarding services, tailored to each particular exhibitor's requirements.

If you are using DB Schenker for transport, your goods will be automatically delivered directly to your stand. Otherwise, DB Schenker can offer forklifting onsite. DB Schenker will approach you if you are not using their transport services to organise onsite forklifting if needed.

There will be no on-site storage facilities for packing materials and boxes. It is recommended that exhibitors consider their storage needs (of packing crates and freight forwarding materials) prior to the exhibition. DB Schenker will contact all exhibitors to discuss individual transportation and other logistics requirements. In the meantime, to request a quote please complete and return the "**Transport Service Booking – Form A**". For further information, please contact:
