The Australian College of Children & Young People's Nurses (ACCYPN) is hosting their 2023 Conference at the Hilton Darwin, Northern Territory, Australia 13 - 15 September 2023

We've designed the program, so you get the most out of your NT experience by either arriving early or staying following the Conference to explore Darwin and the surrounds.

The aim of the Conference is for us to reflect on how we adapted to the global pandemic in providing care to the children and families that we work with, as well as ourselves. We will focus on what worked, what did not, how have our services changed and how can we look at shaping the future of health care for children and young people. We will also address; how did we look after ourselves during this time and what have we learnt about self-care and adapting to a fast-moving situation and information overload.

Western Sydney University

Toward better healthcare for children and young people with intellectual disability and/or autism: Every Nurses' Business

Australia's first National Nursing Workforce Strategy - Workshop

The Commonwealth will develop the first National Nursing Workforce Strategy (the Strategy) in partnership with Victoria and in collaboration with all jurisdictions.

In this workshop we aim to conduct comprehensive consultation and investigative questioning to capture viewpoints on nursing workforce issues with a particular focus on leadership, recruitment and retention, models of care and workforce planning.
