

Michael Snow, Senior Program Manager, RMIT University

Michael is a senior manager within the Property Services Group at RMIT University and is currently focussed on the technical and policy based strategies required within the group to deliver on RMIT's Carbon Neutral commitment by or before 2030.

Having spent a number of years working across both the development and delivery phases of energy and infrastructure projects, Michael is experienced with the technical and commercial management of projects from concept through to operations within both greenfield and brownfield environments. His experience also includes significant exposure to overseas approaches to energy use and management and complex matters such as the connection of embedded generation assets to the grid.

Michael has a passion for energy and sustainability and is also a Climate Reality Leader and Mentor as part of former US Vice President Al Gore's Climate Reality Project.

Theme: A Global Perspective
