

# FIGHT FOR YOUR FUTURE

The insurance industry and corporations know that **trial lawyers** get in their way and will hold them **accountable** for dangerous products, negligent medical care, blatant water contamination, and all of the many other harms caused when profits rather than safety drive decision making.

**So what is their plan?** We don't need to guess. It's been publicly shared that tort reform will be the top priority in 2025. This **threat** is real. Are you going to **fight for your future** and **your clients'** ability to right wrongs?

AAJ's mission to preserve the right to a trial by jury is under attack.

**AAJ is here to support trial lawyers** and their clients through **community, advocacy, and education.**

**Do not let them silence you and your clients.**

**Join AAJ today at [justice.org](https://justice.org)**
