Drones 101 School Course Launched

We've just launched our first drone programming course for schools, **Drones 101!** This fun introductory course will teach kids the basics of coding and computational thinking as they control and program a drone. This is a perfect addition to your elementary or middle school technology class or makerspace.

As a teacher, you don't need to have any previous experience with coding or flying drones; we provide comprehensive teacher guides, answer keys, and lesson plans. Plus, we've partnered with **Parrot Edu** to offer discounted bundles that include

Tynker for Schools

The easiest way to teach **Computer Science in the classroom. No experience required.**

Programming Parrot Drones with Tynker

This is a quick-start guide to program your Parrot drone with the Tynker App. Parrot has a number of [videos](#) that you can watch to unbox and set up the drone.

Compatibility

- **Drone** – Parrot [Rolling Spider](#), [Night](#), [Cargo](#), [Mambo](#), [Jumping Sumo](#) (support for Jumping Sumo on iOS only), or [Swing](#) (partial support for Swing on iOS and Android)
- **Tablet** – Your tablet should support Bluetooth 4.0 in order to pair with the drone. Please refer to [Parrot Support](#) to find out if your tablet is supported.
- **Tynker App** – Make sure you have the most recent version of the app downloaded.

Download Tynker

The Tynker App is supported on iPads and Android-enabled tablets. Note that in addition to Tynker, you can also download Parrot's Free Flight App to connect to the drone.

CUE STEAMPUNK

CUE STEAMPunk Mobile Labs

<http://www.cue.org/steampunk>

Teachers and administrators can sign up for a STEAMPunk Mobile Lab, which consists of a set of classroom-ready robot drones or STEAM materials that will be delivered to their school to help jump start STEAM activities in the classroom.

Classrooms that are selected will be able to borrow 1 (one) STEAMPunk kit for five SCHOOL DAYS and will "pay" for their use by:

- Sharing photo examples of the robots in use with children
- Writing a blog post or being interviewed by the CUE Blog
- Keeping the devices intact and sending back all the parts supplied in good working order.
