

Student award

PhD or master students (under 30 years of age and registered at a university when submitting their paper) are invited to submit a Paper. Registered student papers will be rated by the scientific and technical board before the congress. Five of them are selected and the students are invited (free conference access, including reception and accommodation and contribution to travel costs) for a presentation at the conference. The best presentation is selected by the conference participants and awarded with 3'000 Euro.

Papers are limited to 6 to 8 pages and they will be peer reviewed by the scientific and technical advisory board of INTERPRAEVENT. Your Paper has to fit to the topics of the conference, it must be written in English and satisfy the condition described in the [paper instructions](#), otherwise it may not be considered.
