

HIV Nutrition and Dietetics

MOTIVATION FOR THE WORKSHOP:

HIV care is complex and rapidly changing. Health care professionals must be able to respond to needs ranging from adjusting enteral feeding to facilitate antiretroviral absorption, to supporting overweight people living with HIV who fear deliberate weight loss will disclose HIV status. This workshop will include updated theory, case-studies and practical perspectives on these topics.

TARGET AUDIENCE:

Health care professionals, researchers, managers, service providers, people living with HIV
