

Dr Jessica Foley

United States

Jessica Foley, PhD is Managing Director and Chief Scientific Officer for the Focused Ultrasound Foundation, whose mission is to accelerate development and adoption of focused ultrasound, a breakthrough noninvasive therapeutic medical technology.

Dr Foley oversees scientific programmes and activities that accelerate translation of new treatments for patients. She leads alliance-building efforts with external stakeholders including governmental policymakers, regulatory agencies, and disease-specific foundations.

She is a spokesperson and advocate for the Foundation and the focused ultrasound community. Previous experience includes the medical device industry (Insightec, Medtronic).

Dr Foley holds a BSE in Biomedical Engineering from Duke University and a PhD in Bioengineering from the University of Washington.
