Mr Jigimon Cherian

Kuwait

Jigimon Cherian is an experienced MRI Clinical Education Specialist with a demonstrated history of working in the hospital and healthcare industry. With expertise in Magnetic Resonance, X-ray, Medical Devices, Healthcare Information Technology (HIT), Picture Archiving and Communication System (PACS), and Digital Imaging, Jigimon has a strong foundation in advanced medical technologies.

Jigimon holds a master's degree focused on Magnetic Resonance Imaging (MRI) from Anglia Ruskin University in United Kingdom. His academic pursuits have equipped him with an in-depth understanding of MRI technologies and their applications in the medical field. Previously, Jigimon served as a Senior MRI Technologist for the Ministry of Health in Kuwait. In addition to his role as a technologist, he also contributed as a Clinical Instructor for BSc students in Allied Health at the University of Kuwait. Jigimon' s passion for education and training has helped shape the next generation of healthcare professionals.

Since 2010, Jigimon serves as a Global MRI Application Specialist for Siemens Healthineers, providing comprehensive MR application support to countries around the globe. He also holds the position of Clinical Applications Manager at Sultan United Medical Company, a valued partner of Siemens Healthcare, based in Kuwait.

With his extensive experience and expertise in MRI applications, Jigimon Cherian is well-positioned to deliver valuable insights and share his knowledge at the upcoming conference.
