

Ms Sarah Green

New Zealand

Sarah Green has over 15 years of experience working as an MRI Technologist in Christchurch, New Zealand. She began her MRI training in Dublin, Ireland and then completed her post-graduate study with the University of Sydney. Her main interests in MRI are Cardiac and Neuroimaging.

Throughout her career, she has been involved in many ISMRT committees and is currently the President of the New Zealand National Chapter where she enjoys bringing networking and education opportunities to the MRI community.

Sarah had the privilege of being an elected ISMRT Governing board member from 2018 – 2021. During this time, she served on many committees that have enhanced her career. One of her most rewarding committees was the Divisions Committee. She worked with an enthusiastic team to support the establishment of new ISMRT Divisions in the UK and North America. These new Divisions created an opportunity for local MRI Radiographers and Technologists to have access to world-class MR education. Sarah was reelected to the Governing board in 2022 as the Executive member.

As a member of ISMRT, she has had the opportunity to be involved in all aspects of educational meetings at various levels. She had key roles in organising National Chapter and Division meetings. One of her highlights was organising the first International Joint Division Webinar with the South Carolina and New Zealand Divisions. She has enjoyed having the opportunity to speak at some of these meetings as well as moderating. Another highlight of her time as Chair of the Divisions Committee was promoting an ISMRT in Greece. Together with a team of ISMRT Governing Board members and the team in Greece, they were able to host the first ISMRT webinar in Greek. This was also enjoyed by many non-Greek-speaking MRI professionals globally!

In 2022 she was awarded the Crues-Kressel Award for outstanding contributions to the education of MR radiographers and technologists.

Sarah has completed many courses in Management and Health & Safety. Together all of these have directed her career path into a managerial position. This position helps her to empower other colleagues and encourage education.
