

Mrs Fiona MacGregor

United Kingdom

Fiona (Fee) is Principal Lecturer (International) within the School of Health and Life Sciences at Teesside University with considerable insights into international learning communities.

She qualified as a Diagnostic Radiographer in 2010 and has worked in a range of clinical settings specialising in Neuroradiography. She has extensive experience within the healthcare sector such as mental health social work and nursing. She moved into higher education in 2015, specialising in paediatric forensic radiography, health-related ethics and legislation, student support, and personal tutoring, for which she was recently accredited and is now an assessor.

Fee is currently undertaking her PhD, in which she is exploring barriers and facilitators to the implementation of best practices within forensic radiography. She is actively involved in additional research projects including 'exploring cultural differences in awareness and understanding of physical abuse from an international perspective', and an evaluation of the psychological impacts of diagnostic radiography regarding the support mechanisms utilised. She has co-authored two recently published qualitative research journal articles. She is also co-author of a book chapter on contrast media in medical imaging.

Away from her work and studies, Fee enjoys adventure travelling, including camel trekking in Mongolia and going on camping safaris in Botswana, Zimbabwe and South Africa.
