

Dr Frank Shellock

United States

Frank G. Shellock, Ph.D. is a physiologist with more nearly 40 years of experience conducting laboratory and clinical investigations in the field of MRI. He is the Director of MRI Safety and an Adjunct Clinical Professor of Radiology and Medicine at the Keck School of Medicine, University of Southern California. As a commitment to MRI safety, he created and maintains the internationally popular website, www.MRIsafety.com.

Dr. Shellock's company, Shellock R & D Services, Inc. specializes in the assessment of MRI-related issues for implants and devices and the evaluation of electromagnetic field-related bioeffects. His group has tested thousands of medical products, including passive and active implants, and has been directly involved in the labeling of these items.
