

Dr Wali Badar

United States of America

Dr. Badar is a lifelong Chicago native. He completed his undergraduate degree in biomedical engineering at the University of Illinois at Chicago where he discovered his passion for innovation and medicine.

After graduating college, he enrolled in Chicago Medical School where he embarked on research projects focused on interventional oncology.

Most notably, his research on Yttrium-90 radioembolization therapy for hepatocellular carcinoma and cholangiocarcinoma has been published in notable peer-reviewed journals.

Now as an Interventional Radiology resident at the University of Illinois College of Medicine in Chicago, Illinois, he continues interventional oncology research in efforts to develop breakthrough therapies for complex disease processes.
