

The image features a geological cross-section of rock layers in shades of brown, tan, and blue. Overlaid on this is a colorful, semi-transparent map with a grid pattern, transitioning from red and orange at the top to green and blue at the bottom. A white network of lines and dots is superimposed on the right side of the map.

## GENERAL INFORMATION

### EAGE

The European Association of Geoscientists and Engineers (EAGE) is a global professional, non-profit association for geoscientists and engineers with 19.000 members worldwide. The objective is to collect and distribute technical knowledge. EAGE organizes events and publishes a monthly magazine for its members and 5 scientific journals. All members of EAGE are professionally involved in (or studying) geophysics, petroleum exploration, geology, reservoir engineering, mining and mineral exploration, civil engineering, tunneling and environmental matters. EAGE's head office is located in the Netherlands with regional offices in Moscow, Dubai, Kuala Lumpur and Bogota.

## ABOUT THE WORKSHOP

Our third workshop in Doha, Qatar proposes to continue our exploration of the optimal approach to management of carbonate reservoirs, not just in the Middle East but worldwide.

In the light of feedback from the previous events in 2015 and 2017 we are extending the scope of the workshop to cover the entire reservoir rather than focusing more narrowly on individual wells. For an optimal field development, injectivity and productivity of a well is of course essential, especially in heterogeneous reservoirs such as carbonates. However, this workshop will also take more account of what happens around the wells and the complex issues involved. This means consideration of geological modelling, reservoir simulation, history-matching and uncertainty assessments.

The workshop should appeal to subsurface specialists in well stimulation and completions, log analysis, petrophysics, well test interpretation, reservoir geology and geophysics, applied mathematics, geostatistics and reservoir engineering, but also to subsurface generalists as reservoir managers.

The workshop provides an exceptional opportunity to share experiences and propose new methods from lab scale to reservoir scale, software and hardware tools for the topics under discussion. We indeed do believe that a multi-disciplinary approach is the next step forward to improve our daily work for a better reservoir management of carbonate reservoirs.

## SPONSORING OPPORTUNITIES

With an array of unique promotional opportunities, we can help you design the perfect programme to enhance your company's experience at The Third EAGE Workshop on Well Injectivity & Productivity in Carbonates. The Main Sponsor Programme exposes attendees and businesses to your company and promotes your presence within the industry.

EAGE strives to realize recognition, long term exposure, benefits and publicity for companies that sponsor EAGE workshops.

### WHY BECOME A SPONSOR

When you are a corporate sponsor you get high visibility in a qualitative and uncluttered environment that makes your message stand out. EAGE is synonymous with quality, with proven track records in the past. The workshop programme offers a diverse menu that will help you reach your target audience.

Sponsoring will enable you to:

- Increase your visibility to a national, regional and international audience
- Enhance your corporate image
- Reach an influential and exclusive audience
- Break through the media clutter
- Associate your company with EAGE – World's truly multi-disciplinary geosciences society

Please note that sponsoring opportunities are not restricted to packages in this guide. We would be delighted to explore ideas to fit your budget.
