EAGE CONFERENCE ON
**4TH PRESALT
RESERVOIR**

**FIRST ANNOUNCEMENT &
CALL FOR ABSTRACTS OPEN**

17 – 19 SEPTEMBER 2024 / RIO DE JANEIRO, BRAZIL

WWW.PRESALTRESERVOIR2024.ORG

Welcome to

R I O D E J A N E I R O

BRAZIL.

WELCOME FROM THE TECHNICAL COMMITTEE

In Brazil, there is a strong focus on pre-salt field development activities. Here, additional challenges exist; operators must acquire appropriate subsurface data and successfully develop innovative and integrated technologies that deliver safe production promptly. Critical is the need to implement low-carbon solutions while enhancing recovery factors, and the role of digital initiatives must be recognized concerning optimizing value capture.

On both sides of the South Atlantic, exploration and production activities have demonstrated that the pre-salt play is not without its challenges. Comprehensive reservoir characterization linked to production behavior is a key success factor in the pre-salt. Large volumes of multidisciplinary data are available to support E&P decisions, from regional down to well level, which need to be integrated, visualized, and interpreted. Digital solutions and technology innovations are increasingly important in these respects; they improve efficiencies across the Building on the success of previous events, the 4th EAGE Pre-salt Conference will unite professionals from across the energy sector in the vibrant city of Rio de Janeiro to discuss the latest cutting edge advances and perspectives for the following themes:

- Pre-salt E&P in a maturing play
- Optimizing reservoir characterization, field development strategies, and recovery
- Getting the most from our data: digital innovation in the pre-salt
- The energy transition and CO2 solutions: pre-salt opportunities

We look forward to seeing you in Rio de Janeiro!

Technical Committee

Ian Troth	Equinor
Priscilla Reuters Bitencour	Equinor
James R. Pape	ExxonMobil
Marcos Grochau	Petrobras
Paulo Otavio Gomes	Ecopetrol Brasil
Elaine Maria Lopes Loureiro	Agência Nacional do Petróleo
Santiago Drexler	Shell
Dirk Erickson	Chevron
Gerardo Gaitan	S&P Global
Marco Cesar Schinelli	Petrobras
Roberto de Melo Dias	Petrobras
Leandro Di Marco	Eliis
Emmanuel Saragoussi	SLB
Paulo Roberto Schroeder Johann	SBGF
Adel Khalil	CGG
Pedro Carlos Xavier de Moraes	Halliburton

Location

This event will take place in Rio de Janeiro, Brazil, one of the main economic centers, of cultural and financial resources, the second city with the production industry and headquarters of the most important Brazilian companies in the oil sector.

We welcome you to the wonderful city located at Sur east of the country the beauties of the capital Fluminense reward the imagination of tourists, giving them its beaches, surrounded by squares and samba, its unique mix between city and nature, to the Corcovado, with the maximum view of the city and its horizon to the sea where the imposing oil platforms are a symbol of the development and technology of the sector.

Venue

HILTON RIO DE JANEIRO - COPACABANA

Av. Atlântica, 1020 - Copacabana, Rio de Janeiro

The 5-star Hilton Rio de Janeiro Copacabana is ideally located across from the blue waters of Copacabana Beach. It features an elegant spa and a rooftop pool both with splendid sea views.

Meet Our Keynote Speakers

Rachel Paez
ExxonMobil

Thiago Penna
Equinor

Alexander Zarkhidze
SLB

Rudy Felix Ferreira
PPSA

Jorge Lopez
Shell

Rui Cesar Sansonowski
Petrobras

Gerardo Gaitan
S&P Global

Lúcio Prevatti
Shell

The call for Abstracts is still open!

Whether you're exploring innovative drilling technologies, optimizing production strategies, or delving into reservoir characterization, this conference is the perfect platform to share your insights and network with like-minded professionals.

Don't let this opportunity slip away! Submit your abstract today and be a part of shaping the future of pre-salt reservoir exploration and production.

THE MAIN TOPICS ARE:

- Exploration in a maturing Pre-salt play
- Optimizing reservoir characterization, field development strategies, and recovery:
- Getting the most from our data; digital innovation, imaging advancements, and emerging technologies
- The Pre-salt and the energy transition

Deadline: 3 June 2024
