TECHNICAL COMMITTEE MEMBERS

Aida López Hernández	Universidad Michoacana de San Nicolás de Hidalgo
Ayaz Alam	Universidad de Santiago de Chile (USACH)
Angela Valeria García Lara	AGEOCOL - WING (Woman in Geothermal)
Cesar Augusto Patiño Suarez	Ecopetrol
Claudio Marcelo Fonseca	SLB
Daniel Perez	Geothermal Chamber of Argentina
Eddy Sanchez Rivera	Instituto Costarricense de Electricidad (ICE)
Francisco Porturas	Peruvian Geothermal Association
Grant Wach	Dalhousie University
Joan Flinch	Elsevier
Larissa Estévez	CECACIER
Lina Maria Castaño	Ministerio Minas y Energía Colombia
Luis Quintero	Halliburton
Maurice Dusseault	University of Waterloo
Oscar Llamosa	Asociación Colombiana de Geotermia (AGEOCOL)
Pedro Carrillo	Independent Consultant
Pablo Aguilera	JRG Energy
Stephen Hallinan	CGG

WORKSHOP OVERVIEW

Geothermal energy is a renewable energy source, not affected by climatic factors, sustainable and resilient, but with respect to other green energies, since this resource is in a geological environment, its use has a high risk, especially in the stage exploration. These characteristic risks, can be adequately reduced and managed through a comprehensive understanding of the nature of geothermal reservoirs.

Costa Rica has a high potential for this energy resource, which would allow to satisfy its demand in combination with other clean energies, while generating energy independence and economic development in the region. The objective of the second EAGE Latin America Workshop on Geothermal Energy is to share experiences and lessons learned during Geothermal Resources exploration, development and exploitation stages, in order to establish appropriate practices for commercial uses of geothermal resources in the Americas.

TOPICS

Extended Deadline to Submit your paper before **7 September 2023**

Please submit abstracts on the following topics:

- Exploration of geothermal fields: geology, geochemistry and geophysics.
- Geothermal drilling
- Low temperature geothermal systems - High temperature geothermal systems
- Non-conventional systems: EGS and SHGS
- Geothermal reservoir characterization
- Geothermal reservoir development
- Geothermal modeling
- Geothermal field operation
- Sustainable geothermal developing and exploration policies
- Geotechnical constraints and hazards
- Country updates
- Direct uses
- Policy and market

OPENING FORUM

Ronny Rodríguez Chavez

Viceminister of Energy of the Ministry of Environment and Energy of Costa Rica

Heber Didier Diez León

President of the Mexican Geothermal Association (CFE)

Werner Isaac Vargas Torres

General Secretary of the Central American Integration System SICA

Bernhardt Johst

Principal Regional Advisor of the GEO II project
