GENERAL INFORMATION

EAGE

The European Association of Geoscientists and Engineers (EAGE) is a global professional, non-profit association for geoscientists and engineers with 19.000 members worldwide. The objective is to collect and distribute technical knowledge. EAGE organizes events and publishes a monthly magazine for its members and 5 scientific journals. All members of EAGE are professionally involved in (or studying) geophysics, petroleum exploration, geology, reservoir engineering, mining and mineral exploration, civil engineering, tunneling and environmental matters. EAGE's head office is located in the Netherlands with regional offices in Moscow, Dubai, Kuala Lumpur and Bogota.

ABOUT THE WORKSHOP

Exploration in the Eastern Mediterranean has been reignited by important gas discoveries during the last decade. With finds in the Offshore of Egypt, Cyprus and the Levant Basin, the area is now considered a highly prospective petroleum province.

The regions' complex geodynamic history has seen it evolve from two Tethyan passive continental margins to one dominated by Alpine collision and neotectonic subduction-accretion along its northern flank.

Rifting was initiated in the Permo-Triassic, continued through the Mesozoic and was characterized by the development of a mixed siliciclastic-carbonate platform attached to the African, Arabian and Eurasian plates as well as the formation of isolated carbonate outer-high platforms located on continental blocks (e.g., Eratosthenes, Ionian Sea and around Apulia). The subsequent influx of siliciclastic sediments due to the tilting of the Afro-Arabian shoulders and the initiation of Cenozoic (Tauride, Hellenide, Albanide, Apennine and Dinaride) fold-and-thrust systems during the late Oligocene to early Miocene giving birth to younger reservoirs. Subsequent marine isolation and evaporation led to the Messinian Salinity Crisis before rejuvenated clastic systems were restored in the Late Neogene in response to northward drainage off the African continent (Nile Delta), continued collision and a neotectonic overlay.

In an effort to unlock hydrocarbon deposits below the Messinian salt layer, geologists and industry experts are keen to conduct ambitious geological and geophysical exploration and drilling, looking to identify unexplored oil-and-gas targets in ultradeep waters. Their identification will require further geological understanding and more technical development in geophysical imaging, rock mechanics and reservoir properties at important depths before proceeding to drill and safety.

SPONSORING OPPORTUNITIES

With an array of unique promotional opportunities, we can help you design the perfect programme to enhance your company's experience at Second EAGE Eastern Mediterranean Workshop. The Main Sponsor Programme exposes attendees and businesses to your company and promotes your presence within the industry.

EAGE strives to realize recognition, long term exposure, benefits and publicity for companies that sponsor EAGE workshops.

WHY BECOME A SPONSOR

When you are a corporate sponsor you get high visibility in a qualitative and uncluttered environment that makes your message stand out. EAGE is synonymous with quality, with proven track records in the past. The workshop programme offers a diverse menu that will help you reach your target audience.

Sponsoring will enable you to:

- Increase your visibility to a national, regional and international audience
- Enhance your corporate image
- Reach an influential and exclusive audience
- Break through the media clutter
- Associate your company with EAGE – World's truly multi-disciplinary geosciences society

Please note that sponsoring opportunities are not restricted to packages in this guide. We would be delighted to explore ideas to fit your budget.
