

Dawit Wolday is trained as a Medical Doctor at Addis Ababa University (AAU) (1987), and obtained his MSc (Microbiology) from AAU (1993), Ethiopia, and his PhD (Immunology) Karolinska Institutet, Stockholm (2000). He is currently an Associate Professor of Medicine at Mekelle University College of Health Sciences, Ethiopia. He has three decades of research experience in infectious diseases, including HIV/AIDS, tuberculosis, malaria, sexually transmitted infections and neglected infectious diseases. His experience covers molecular epidemiology, clinical studies, drug resistance, pathogenesis and diagnostics.

Dr. Wolday teaches different courses at undergraduate and postgraduate levels. He has ample experience in mentoring postgraduates; currently promoter of 4 PhD and 1 MSc programs. He serves as an editorial board/reviewer of several scientific journals, as well as grant organizations.

Dr. Dawit has received several research grant awards and has published 110 manuscripts and 2 book sections. He is a Senior EDCTP Research Fellow and coordinator of "*Evaluation of the LAMP & db-PCR-NALFIA for the Diagnosis and/or as Test-of-Cure in Patients with Visceral Leishmaniasis in Ethiopia (TMA2016SF-1437)*", and "*Rapid Diagnostic Profiling of SARS-CoV-2 in the Context of Persistent Immune Activation in Sub-Saharan Africa (RIA2020EF-2905)*" – both funded by EDCTP.
