Abstract

The sustainable competitiveness requests a new VET system tailored to the UN 2030 Agenda for Sustainable Development. Green and digital transformation brings social, economic, environmental and governance "transitions to fair and prosperous sustainability. (European Commission. Directorate-General for Research and Innovation. 2020). Prosperous sustainability is on the path to recovery driven by research and innovation. (European Commission. Directorate-General for

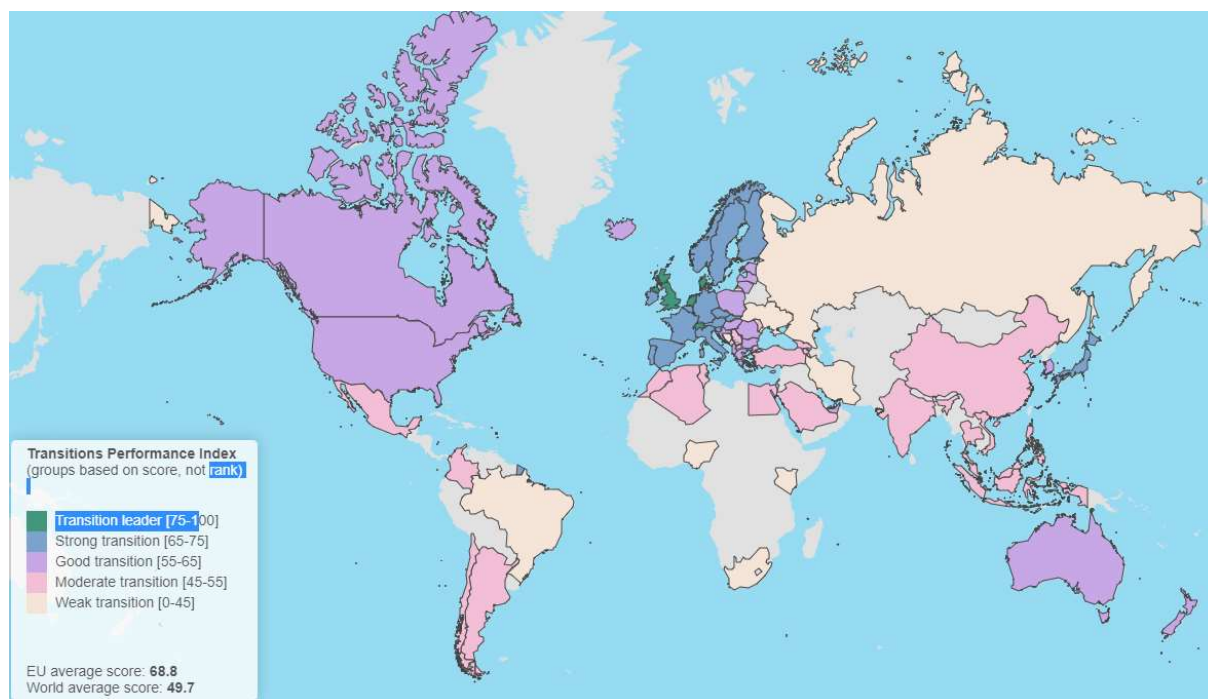

¹ Fellowship represents a status within the RSA Regional Studies Association starting with 29.01.2020. RSA Fellows are individual members who have been permanent members for at least 5 years and who have also been defined as "active members".

Research and Innovation. 2021) Following the approach of (Borchard et al. 2020), on the Know SDGs Platform, we use the text mining tool SDG Policy Mapping to search the "competitiveness" keyword across the relevant legal policy documents. We estimate the gaps in implementation by comparing the national SDGs spectrum from the VET system with the normative SDGs spectrum. The VET SDGs gap in the VET system is a useful tool to adjust VET systems' VET strategies to contribute to "transitions to fair and prosperous sustainability fully". On the edge of sustainable recovery for the EU, competitiveness must change the approach to create and deliver new skills. Digital transformation offers unique opportunities to overcome the Covid Crises only if sustainable multilevel governance policies implement the 2030 Agenda coherent with VET policy

Introduction

The sustainable competitiveness requests a new VET system tailored to the UN 2030 Agenda for Sustainable Development. Green and digital transformation brings social, economic, environmental and governance "transitions to fair and prosperous sustainability. (European Commission. Directorate-General for Research and Innovation. 2020). Prosperous sustainability is on the path to recovery **driven by research and innovation**. (European Commission. Directorate-General for Research and Innovation. 2021) Europe is engaged on “resilience, inclusiveness and sustainability” through its Annual Sustainable Growth Strategy. Transition Performance Index (TPI) is a monitoring tools for the annual Eurostat Sustainable Development Goals monitoring report (Figure 1) In July 2022 the TPI calculated across 72 countries” (27 EE and other 45) confirm the Europe’s leader position at global level in achieving the new model of prosperous sustainability. TIPI integrates 4 dimensions: *economic, social, environmental and governance transition*. The TPI tool produces findings that “**highlight the crucial role investment in research and innovation has to support the path to recovery towards prosperous sustainability**”.

Figure 1. European Commission’s Transition Performance Index (TPI)

EC-GISCO Credit: EC-GISCO, © EuroGeographics © UN-FAO for the administrative boundaries

The 6 Commission Priorities for 2019-2024 also express the main values: **resilience, inclusiveness and sustainability** though:

“A European Green Deal

*A Europe fit for the digital age
A stronger Europe in the world
Promoting our European way of life
A new push for European democracy²*

All these values proves that UN 2030 Agenda for Sustainable Development is at the very core of EU policies. The automated attribution of SDGs to each policy document starts in 2017 and cover the new period 2021-2024. Following the approach of (Borchard et al. 2020), **on the Know SDGs Platform, we use the text mining tool SDG Policy Mapping to search the "competitiveness" keyword across the relevant legal policy documents.** The search results provide the documents **Council Recommendation** of 24 November 2020 on vocational education and training (VET) for sustainable competitiveness, social fairness and resilience 2020/C 417/01³ and **Regulation (EU) 2021/690 of the European Parliament and of the Council of 28 April 2021 establishing a programme for the internal market, competitiveness of enterprises, including small and medium-sized enterprises, the area of plants, animals, food and feed, and European statistics (Single Market Programme) and repealing Regulations (EU) No 99/2013, (EU) No 1287/2013, (EU) No 254/2014 and (EU) No 652/2014 (Text with EEA relevance)⁴.** **Their common value is redesigning vocational education and training (VET) policy to respond to green and digital skills for sustainability.** In short, the new VET policy objective is "sustainable competitiveness, social fairness and resilience." **We map these relevant legal policy documents at the EU level with any specific reference to "Sustainable Development Goals" or "2030 Agenda" in the text. The JRC SDG Mapper detects the relevant SDGs by their ranking and illustrates the Commission level's policy coherence. This SDGs spectrum is the normative scale as a political guideline for the 2021-2027 period.**

To identify the gap, we map the VET systems description. The text mining with the JRC SDG Mapper makes the text mining analyse the Refer Net, Cedefop's VET Reports of each EU Member State plus the United Kingdom, Norway, and Iceland. This VET report template is similar for each country, covering the "training system within a broad political, social, economic, and labour market framework" (CEDEFOP). The European VET systems mapping result generates a snapshot of the relevant SDGs by their ranking and illustrates the national policy coherence. We compare the national SDGs spectrum from the VET system with the normative SDGs range. We estimate the gaps in implementation and identify good practices. The VET SDGs gap in the VET system is a useful tool to adjust VET systems' VET strategies to contribute to "transitions to fair and prosperous sustainability fully".

Digital transformation offers unique opportunities to overcome the Covid Crises only if sustainable multilevel governance policies implement the 2030 Agenda coherent with VET policy.

Method & data

The high complexity of the policy framework fully benefits from the access of AI tools provided by JRC as it is **JRC SDG Mapper**. The massive of legal documents for policies are explored following 3 steps:

1. Identify the main competitiveness policy documents. We search by the key word "competitiveness" all the policy documents **Policy Mapping/Know SDGs** on the New Commission activities strategic interpretation can be performed on the results.
2. Establish the "normative occurrence profile of competitiveness according to its links with Agenda 2030 and the 17 SDGs. We load the documents selected in the first step on the **JRC SDG Mapper** and we obtain the competitiveness policy profile interlinkage with sustainable development";

² https://ec.europa.eu/info/strategy/priorities-2019-2024_en

³ In short **VET 2020 Council Recommendation**

⁴ **Regulation (EU) 2021/690 on the 2021-2027 Programme for internal market, competitiveness of enterprises**

3. Relevant SDGs in CDEFOP's national VET documents detected by ranking of the number of occurrences. This step is runned for 29 European Countries;
4. Compare the normative occurrence profile with each country VET occurrence profile and map the results.

Results

1. **Policy Mapping/Know SDGs** identify the as the main competitiveness policy documents: competitive framework for the VET is designed by the **documents VET 2020 Council Recommendation and Regulation (EU) 2021/690 on the 2021-2027 Programme for internal market, competitiveness of enterprises**.
2. **JRC SDG Mapper**, applied on the **documents VET 2020 Council Recommendation and Regulation (EU) 2021/690 on the 2021-2027 Programme for internal market, competitiveness of enterprises** identify the following “normative profile of competitiveness according to its links with Agenda 2030:
 - C_SDG1 1.4%;
 - C_SDG4 78.1%;
 - C_SDG8 16.7%;
 - C_SDG9 1.9%;
 - C_SDG10 0.9%;

Where C_ is from the VET competitiveness policy framework;

3. **Relevant SDGs in CDEFOP's national 2019 VET documents by country, detected by ranking (Table 1) as a result of running JRC SDG Mapper**

Table 1. 3. Relevant SDGs in CDEFOP's national 2019 VET documents by country, detected by ranking as a result of running JRC SDG Mapper

4. Mapping the gap implementation in VET competitiveness policy during 2021-2027 where “red areas” are higher values than competitive framework for the VET

The share of relevant SDGs by countries running the CDEFOP’s national VET documents using the JRC SDG Mapper is detected by ranking of its number of occurrences and presented in the Maps 1 to Map 8.

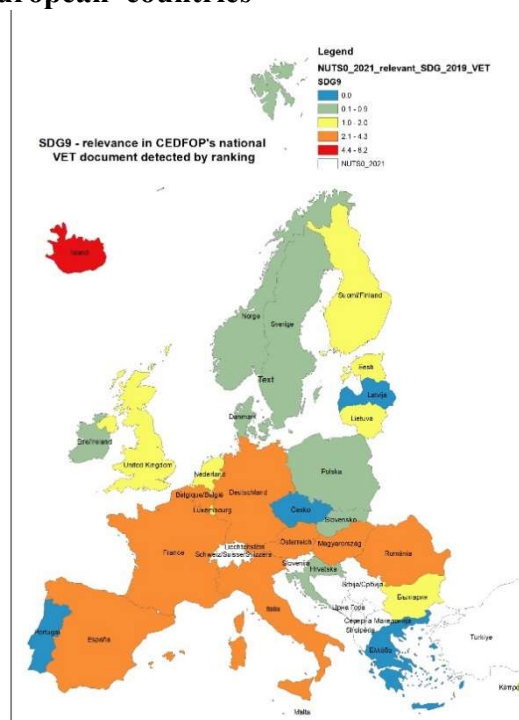

Map 1. The SDG1 relevance in 2021-2027 VET competitiveness framework across 29 European countries

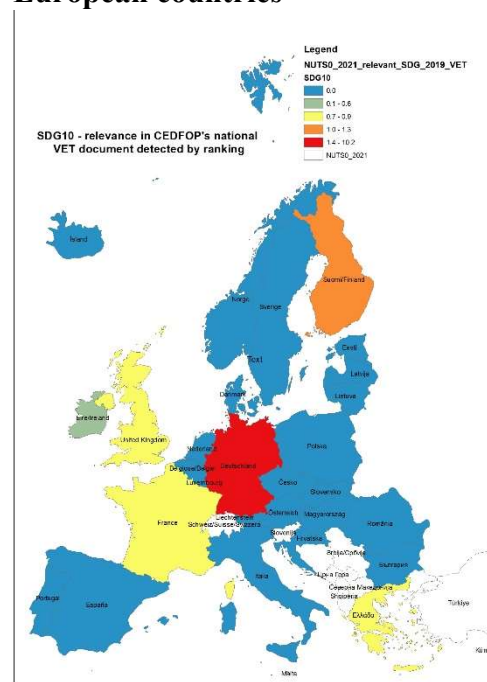

Map 2. The SDG4 relevance in 2021-2027 VET competitiveness framework across 29 European countries

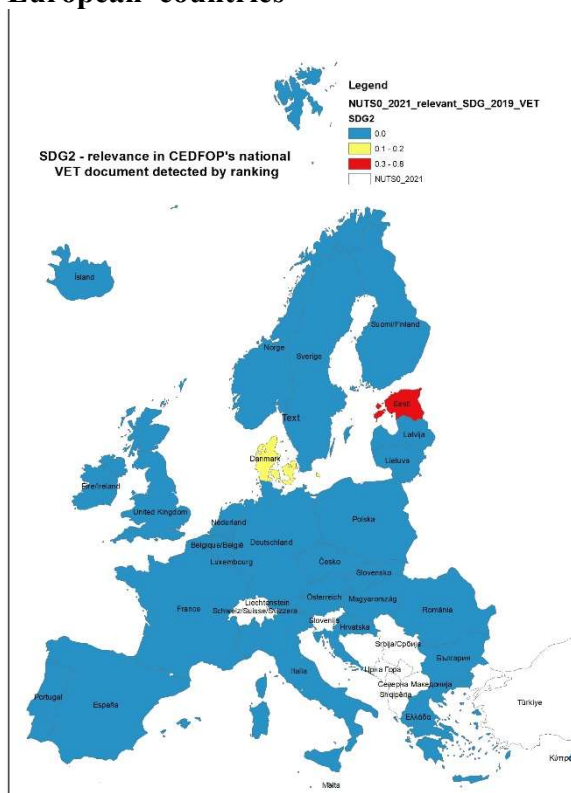

Map 3. The SDG9 relevance in 2021-2027 VET competitiveness framework across 29 European countries

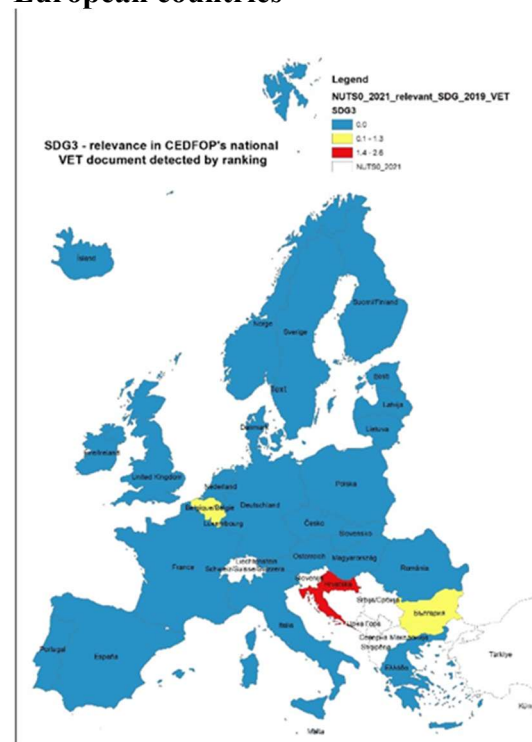

Map 4. The SDG10 relevance in 2021-2027 VET competitiveness framework across 29 European countries

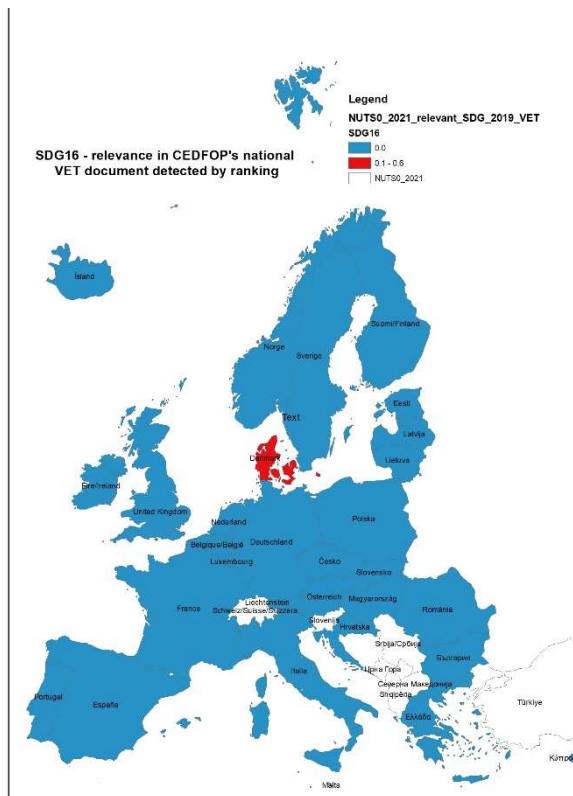

Map 5. The SDG2 relevance in 2021-2027 VET competitiveness framework across 29 European countries

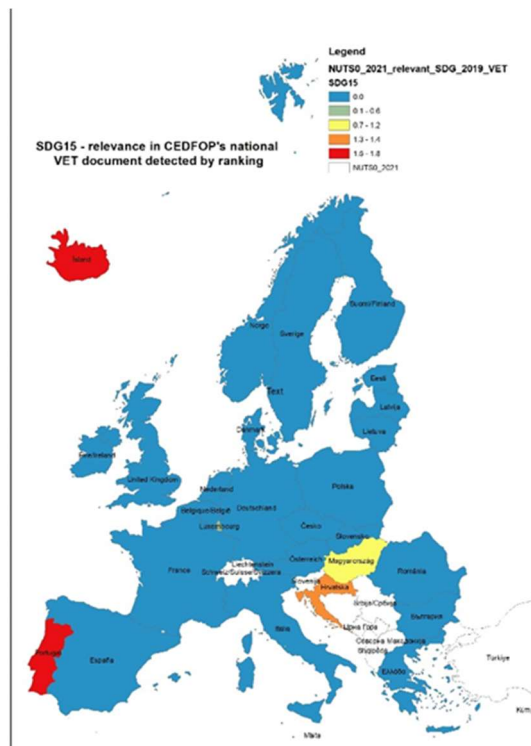

Map 6. The SDG3 relevance in 2021-2027 VET competitiveness framework across 29 European countries

Map 7. The SDG16 relevance in 2021-2027 VET competitiveness framework across 29 European countries

Map 8. The SDG15 relevance in 2021-2027 VET competitiveness framework across 29 European countries

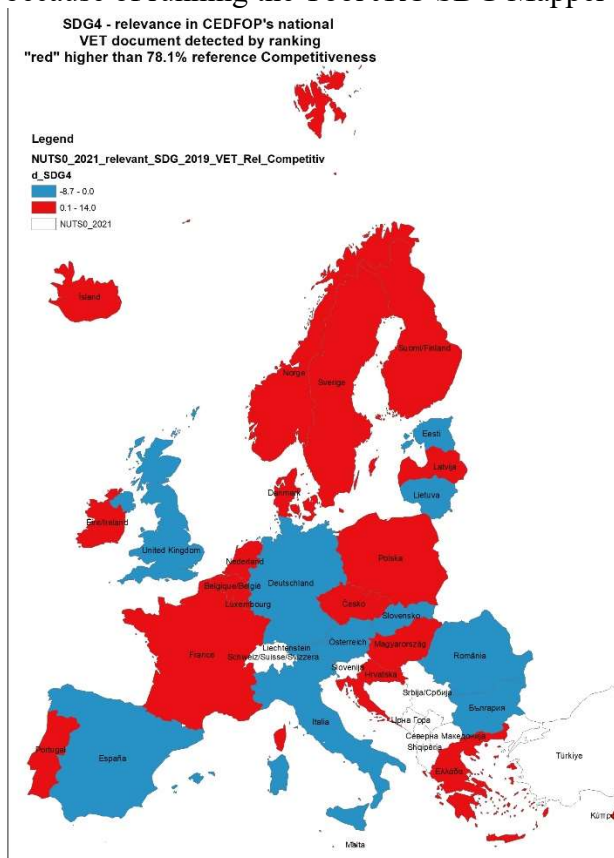

5. Identify the gaps in relevant SDGs in 2019 CDEFOP's national VET implementation framework by ranking where:

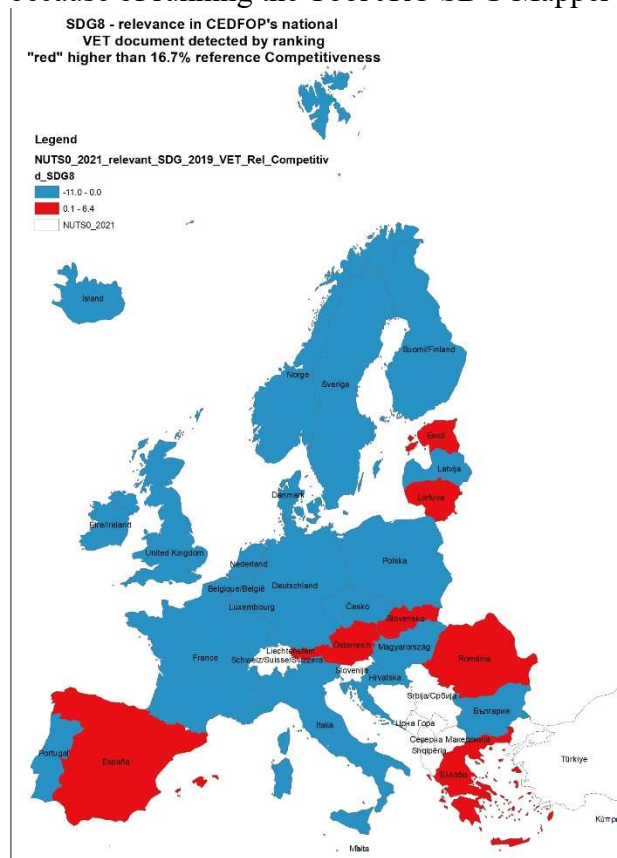

- “red areas” are countries with higher values than competitive normative scale for the analysed SDG – overevaluation of the SDG;
- “blue areas” are countries with lower values than competitive normative scale for the analysed SDG – underevaluation of the analysed SDG.

The over evaluation and underevaluation by relevant SDGs in 2019 CDEFOP's national VET implementation framework is illustrated in the Map 9 to Map 13.

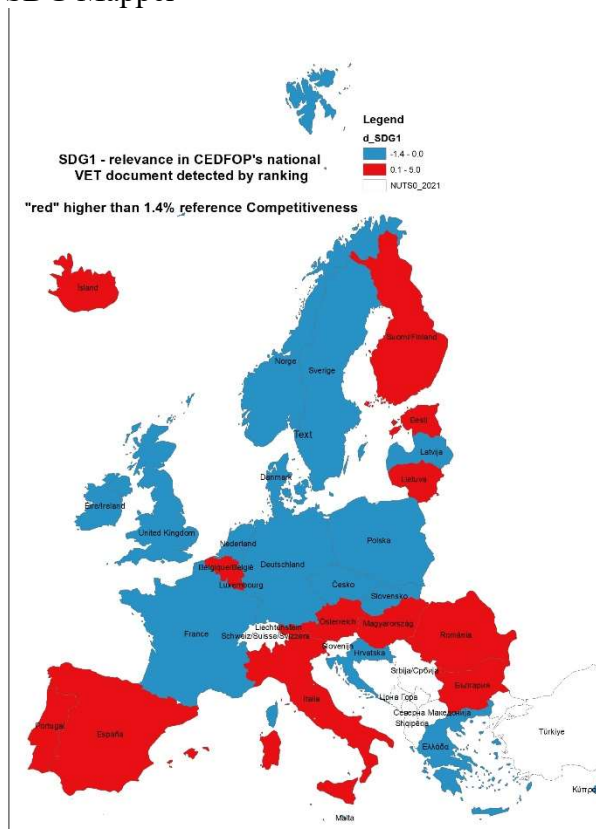

Map 9. Identify the gaps by SDG4s between the European normative VET competitiveness framework and each country SDG4 ranking found in CDEFOP's national 2019 VET because of running the Tool JRC SDG Mapper

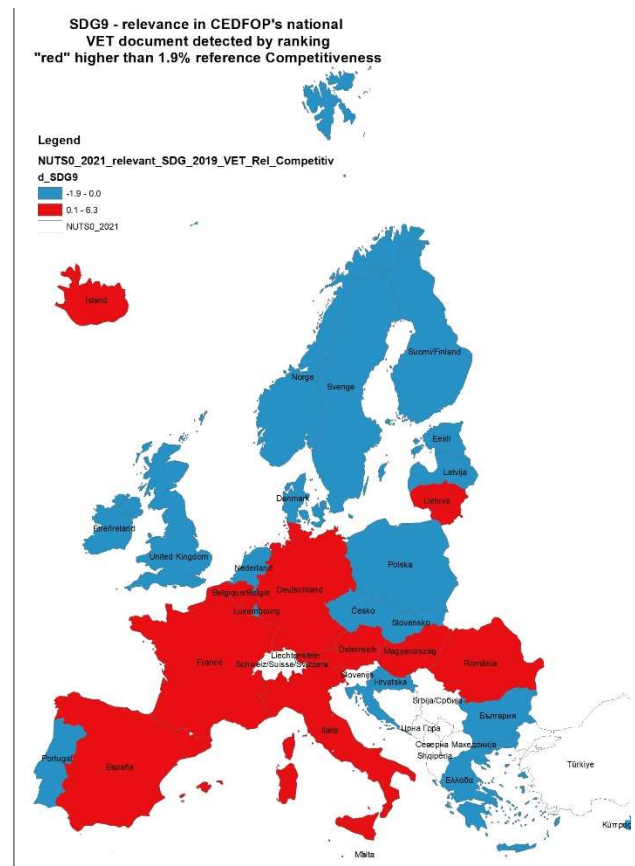

Map 10. Identify the gaps by SDG8 between the European normative VET competitiveness framework and each country SDG8 ranking found in CDEFOP's national 2019 VET because of running the Tool JRC SDG Mapper

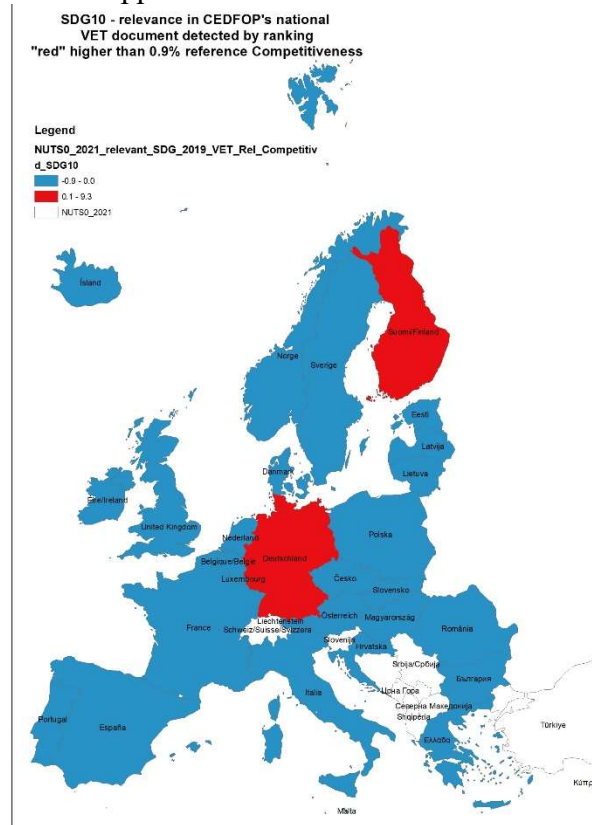

Map 11. Identify the gaps by SDG1s between the European normative VET competitiveness framework and each country SDG1 ranking found in CDEFOP's national 2019 VET because of running the Tool JRC SDG Mapper

Map 12. Identify the gaps by SDG9 between the European normative VET competitiveness framework and each country SDG9 ranking found in CDEFOP's national 2019 VET because of running the Tool JRC SDG Mapper

Map 13. Identify the gaps by SDG10s between the European normative VET competitiveness framework and each country SDG10 ranking found in CDEFOP's national 2019 VET because of running the Tool JRC SDG Mapper

Discussion

The highest variability of SDGs relevance in 2021-2027 VET competitiveness framework across 29 European countries is visible for SDG 1, 4, 9 and 10 (see Map1 to Map4) SDG 1, 4 and 9 exemplify the North-South pattern of European Labour market space.

The North is richer, and is focused on increasing the Quality Education (SDG 4), less interested in reducing poverty and to invest in Industry, Innovation, and Infrastructure (SDG 9)

South is concerned reducing poverty and inequalities (SDG1. No Poverty and to SDG 10 : Reduced Inequality), invest in in Industry, Innovation, and Infrastructure (SDG 9), and less interested in Quality Education (SDG 4),

The SDG 2, 3, 6 and 15 are relevant only for some countries, present a local relevance character.

Conclusion

- The sustainable competitiveness requests a new VET system tailored to the UN 2030 Agenda for Sustainable Development.
- The JRC SDG Mapper detects the relevant SDGs by their ranking and illustrates the Commission level's policy coherence. This SDGs spectrum of the competitive framework for the VET is designed by the documents CELEX_32020H1202(01) and CELEX_32021R0690. The normative scale for 2021-2024 indicates the SDG4 with 78.1% occurrence probability and the SDG 8 with 16.7% as the most relevant SDGs for the VET competitive tailored system that respond to the both digital and green transformations;
- The average occurrence in the National Documents that describes the VET system in a comparative template built by CEDEFOP indicates a gap to normative scale:
 - Over importance for the SDG4 of 3.35 pp in average with an occurrence of 81.45%;
 - Under evaluation for the SDG 8 of 3.76pp in average with an occurrence of 12.9%;
- Quality in education and decent work are twin goals on labour market. The policy is still unbalanced and need an holistic approach;
- Quality in education is more theoretical and political demand with a high deficit in availability of data according to sdg-tracker

The 17 sustainable development goals

(SDGs) to transform our world:

GOAL 1: No Poverty

GOAL 2: Zero Hunger

GOAL 3: Good Health and Well-being

GOAL 4: Quality Education

GOAL 5: Gender Equality

GOAL 6: Clean Water and Sanitation

GOAL 7: Affordable and Clean Energy

GOAL 8: Decent Work and Economic Growth

GOAL 9: Industry, Innovation, and Infrastructure

GOAL 10: Reduced Inequality

GOAL 11: Sustainable Cities and Communities

GOAL 12: Responsible Consumption and Production

GOAL 13: Climate Action

GOAL 14: Life Below Water

GOAL 15: Life on Land

GOAL 16: Peace and Justice Strong Institutions

GOAL 17: Partnerships to achieve the Goal

The indicators of the competitiveness framework for relevant SDGs a result of running the Tool
JRC SDG Mapper with European Commission's essential Competitiveness Framework:
Council Recommendation of 24 November 2020 & Regulation (EU) 2021/690

INDICATOR NUMBER	SDG	TARGET	INDICATOR DESCRIPTION
1.3.1	1	1.3	Proportion of population covered by social protection floors/systems, by sex, distinguishing children, unemployed persons, older persons, persons with disabilities, pregnant women, new-borns, work-injury victims and the poor and the vulnerable
1.4.1	1	1.4	Proportion of population living in households with access to basic services
1.4.2	1	1.4	Proportion of total adult population with secure tenure rights to land, (a) with legally recognized documentation, and (b) who perceive their rights to land as secure, by sex and type of tenure
1.5.1	1	1.5	Number of deaths, missing persons and directly affected persons attributed to disasters per 100,000 population
1.5.2	1	1.5	Direct economic loss attributed to disasters in relation to global gross domestic product (GDP)
1.5.3	1	1.5	Number of countries that adopt and implement national disaster risk reduction strategies in line with the Sendai Framework for Disaster Risk Reduction 2015-2030
1.5.4	1	1.5	Proportion of local governments that adopt and implement local disaster risk reduction strategies in line with national disaster risk reduction strategies
2.1.1	2	2.1	Prevalence of undernourishment
2.1.2	2	2.1	Prevalence of moderate or severe food insecurity in the population, based on the Food Insecurity Experience Scale (FIES)
2.3.1	2	2.3	Volume of production per labour unit by classes of farming/pastoral/forestry enterprise size
2.3.2	2	2.3	Average income of small-scale food producers, by sex and indigenous status
2.4.1	2	2.4	Proportion of agricultural area under productive and sustainable agriculture
3.8.1	3	3.8	Coverage of essential health services
3.8.2	3	3.8	Proportion of population with large household expenditures on health as a share of total household expenditure or income
3.d.1	3	3.d	International Health Regulations (IHR) capacity and health emergency preparedness
3.d.2	3	3.d	Percentage of bloodstream infections due to selected antimicrobial-resistant organisms
4.1.1	4	4.1	Proportion of children and young people (a) in grades 2/3; (b) at the end of primary; and (c) at the end of lower secondary achieving at least a minimum proficiency level in (i) reading and (ii) mathematics, by sex

	4	4.1	Completion rate (primary education, lower secondary education, upper secondary education)
4.3.1	4	4.3	Participation rate of youth and adults in formal and non-formal education and training in the previous 12 months, by sex
4.4.1	4	4.4	Proportion of youth and adults with information and communications technology (ICT) skills, by type of skill
4.5.1	4	4.5	Parity indices (female/male, rural/urban, bottom/top wealth quintile and others such as disability status, indigenous peoples and conflict-affected, as data become available) for all education indicators on this list that can be disaggregated
4.b.1	4	4.b	Volume of official development assistance flows for scholarships by sector and type of study
4.c.1	4	4.c	Proportion of teachers with the minimum required qualifications, by education level
7.3.1	7	7.3	Energy intensity measured in terms of primary energy and GDP
8.1.1	8	8.1	Annual growth rate of real GDP per capita
8.2.1	8	8.2	Annual growth rate of real GDP per employed person
8.3.1	8	8.3	Proportion of informal employment in total employment, by sector and sex
8.5.1	8	8.5	Average hourly earnings of employees, by sex, age, occupation and persons with disabilities
8.5.2	8	8.5	Unemployment rate, by sex, age and persons with disabilities
9.1.1	9	9.1	Proportion of the rural population who live within 2 km of an all-season road
9.1.2	9	9.1	Passenger and freight volumes, by mode of transport
9.3.1	9	9.3	Proportion of small-scale industries in total industry value added
9.3.2	9	9.3	Proportion of small-scale industries with a loan or line of credit
9.5.1	9	9.5	Research and development expenditure as a proportion of GDP
9.5.2	9	9.5	Researchers (in full-time equivalent) per million inhabitants
10.2.1	10	10.2	Proportion of people living below 50 per cent of median income, by sex, age and persons with disabilities
10.3.1	10	10.3	Proportion of population reporting having personally felt discriminated against or harassed in the previous 12 months on the basis of a ground of discrimination prohibited under international human rights law
10.5.1	10	10.5	Financial Soundness Indicators
10.7.1	10	10.7	Recruitment cost borne by employee as a proportion of monthly income earned in country of destination
10.7.2	10	10.7	Number of countries with migration policies that facilitate orderly, safe, regular and responsible migration and mobility of people
10.7.3	10	10.7	Number of people who died or disappeared in the process of migration towards an international destination
10.7.4	10	10.7	Proportion of the population who are refugees, by country of origin
11.a.1	11	11.a	Number of countries that have national urban policies or regional development plans that (a) respond to population dynamics; (b) ensure balanced territorial development; and (c) increase local fiscal space
12.2.1	12	12.2	Material footprint, material footprint per capita, and material footprint per GDP
12.2.2	12	12.2	Domestic material consumption, domestic material consumption per capita, and domestic material consumption per GDP

12.3.1	12	12.3	(a) Food loss index and (b) food waste index
12.5.1	12	12.5	National recycling rate, tons of material recycled
12.6.1	12	12.6	Number of companies publishing sustainability reports
13.2.1	13	13.2	Number of countries with nationally determined contributions, long-term strategies, national adaptation plans and adaptation communications, as reported to the secretariat of the United Nations Framework Convention on Climate Change
13.2.2	13	13.2	Total greenhouse gas emissions per year
15.5.1	15	15.5	Red List Index
16.4.1	16	16.4	Total value of inward and outward illicit financial flows (in current United States dollars)
16.4.2	16	16.4	Proportion of seized, found or surrendered arms whose illicit origin or context has been traced or established by a competent authority in line with international instruments
16.5.1	16	16.5	Proportion of persons who had at least one contact with a public official and who paid a bribe to a public official, or were asked for a bribe by those public officials, during the previous 12 months
16.5.2	16	16.5	Proportion of businesses that had at least one contact with a public official and that paid a bribe to a public official, or were asked for a bribe by those public officials during the previous 12 months
16.6.1	16	16.6	Primary government expenditures as a proportion of original approved budget, by sector (or by budget codes or similar)
16.6.2	16	16.6	Proportion of population satisfied with their last experience of public services
16.a.1	16	16.a	Existence of independent national human rights institutions in compliance with the Paris Principles
16.b.1	16	16.b	Proportion of population reporting having personally felt discriminated against or harassed in the previous 12 months on the basis of a ground of discrimination prohibited under international human rights law
17.6.1	17	17.6	Fixed Internet broadband subscriptions per 100 inhabitants, by speed
17.10.1	17	17.1	Worldwide weighted tariff-average
17.17.1	17	17.17	Amount in United States dollars committed to public-private partnerships for infrastructure

DYNAMIC ANALYSIS OF THE SDGS: ACHIEVING THE SDGS WITH UGANDA'S THIRD NATIONAL DEVELOPMENT PLAN

This report examines the potential medium- to longer-term impact of Uganda's Third National Development Plan (NDP III) on sustainable development in Uganda. The impact is measured using targets set both within the international framework of the Sustainable Development Goals (SDGs) and NDP III for Uganda. The report identifies accelerators in the NDP III that catalyse SDG attainment and enable progress towards the achievement of NDP III and ultimately Uganda's Vision 2040 goals.
