Date: 17-18th September 2021

MESSAGE FROM THE CHAIR

The journey of a **health care professional** is exceptionally challenging. Health career guidance has been nearly forgotten in the healthcare programs for a long time.

At times of stress, and uncertainties, students and juniors indeed require support and guidance from peers and mentors. The highly competitive nature of the healthcare profession hinders many students from joining post-graduate studies of their choice. This **requires** them to understand the best approach to **achieve their dreams**.

We bring **The Saudi Commission for Health Specialties and program directors** together with trainees, hoping to fill the gaps and better understand the authoritative bodies and training programs. We invite all **Health Care professionals in KSA** to this comprehensive conference on career paths and mentorship that will expectantly satisfy the trainees' needs and diminish their worries.

More than **20 speakers** are participating in delivering rich topics and conducting around **20-panel discussions**. Adding around **37 workshops** to the conference will further guide the trainees, improve their skills and equip them with tools and guidance to elevate their challenging career journey.

INTRODUCTION AND NEEDS ASSESSMENT

Saudi Arabia is a blooming nation; **KSA** leaders put in motion the Saudi **2030 vision**, a strategic framework to shift the **oil and petrol** industries' dependency, develop other sectors for a diversified economy, and grow sustainability and self-sufficiency.

The Healthcare sector in **KSA** is the fastest-growing and a top priority for the government; thus, it has a crucial part of the 2030 vision. The Saudi Commission for Health Specialties (**SCFHS**) invested in the growth and the improvement of the Healthcare sector. In **2019**, the government spent **46 billion dollars on healthcare** coverage, equivalent to **15%** of the total government spending. The healthcare sector grew at a compound rate of **12.3% in 2020**.

Increasing the availability of a skilled workforce in healthcare is also a focus in the Kingdom. Significant efforts were initiated to provide education and training to healthcare professionals, increase the workforce, and meet healthcare professionals' current and future demands.

The challenge is how to satisfy the need while maintaining the quality and patient care integrity, and the standard of care. The need to cover the 2030 vision in all specialties is increasing (refer to Tables 1 for details).

As of **2019**, to execute the **2030 vision**, KSA needs to **hire 710,000 healthcare professionals**. The **SCFHS** has put forward qualification exams and supervised training programs for healthcare professionals to achieve this goal. However, the trainees' journey is stressful, demanding, and competitive, which requires guidance, advice, clarity, and senior help. Hence, this conference aims to meet the trainees' needs in their journey, from students to practitioners.

TABLE 1: Overview on the Saudi Healthcare workforce - SCFHS study 2018-2022

DISCIPLINE	NO. SCHOOLS	GOVERNMENTAL VS. PRIVATE	TOTAL EN-ROLLED	TOTAL OF PROFESSIONALS NOW	AVERAGE GRADUATES PER YEAR	NEED BY 2030 TO MEET THE RATIOS
DOCTORS	37	29/8	26,216	93,966	1,936	13,700
NURSING	39	25/14	17,085	83,596	13,862	185,722
DENTAL	27	19/8	12,488	30,954	1,500	**
PHARMACY	27	21/6	14,004	29,090	1,500	100,000
APPLIED HEALTH	51	34/17	31,463	26,907	2000	27,525

** missing data

According to this same report from the Saudi Commission Health Specialties, 2,433 Doctors, 277 Dentists, 719 RNs, 414 pharmacists, 2,759 applied health studying abroad will graduate by the year 2022. Taking into consideration these numbers, the projected need, and the churn rate (%5 for doctors, %20 for Nursing, and %10 for all other healthcare specialties), KSA needs to have a clear plan on how to recruit in the needed specialties, to fill in the gap and secure the pipeline for the future.

DESCRIPTION OF THE EVENT & TARGET AUDIENCE

This educational program targets students, interns, residents, and fellows, in all healthcare disciplines (Physicians, Dental, Radiology, Nursing, Laboratory, Physiotherapy, and Pharmacy) in their journey towards success.

The Program is designed to engage different stakeholders, leaders, experts, program directors, seniors, and peers to raise awareness, improve communications between stakeholders, help students understand the workforce needs, and be familiar with the different career paths and support systems available to them in the Kingdom.

In this event, through a holistic and comprehensive approach, we address career path challenges and offer a unique program that assists in creating a healthy future path for healthcare professionals, from students to practitioners, including; coping with burnout and stress, wellbeing, and self-care. We bring new trainee supportive programs to light, such as the bridging program and mentor-mentee volunteers, highlighting the available resources to help juniors have a better vision for their future careers. In addition to this, we highlight the best ways and tips for successfully passing the Saudi Commission's Licensing exams since failure rates are high in all disciplines, limiting the chances of progression in the students' areas of choice. We aim to shed light on these challenges and offer higher success, better planning, career aspirations, and advice.

This activity will be held over 2 days. CME credits are applied from the SCFHS. Workshops are planned to be completed the week after the event.

OBJECTIVES

BY THE END OF THIS EVENT, ATTENDEES WILL:

- Construct an improved pathway to follow while discussing career plan's challenges by meeting with senior professionals and program directors
- Explore the practice of mentor-mentee in the medical profession in KSA and ways to improve it as well as learning from international communities on best practices
- Recognize sources of the stress and worry in their career plan, and discuss techniques of coping with them and finding resources available for their support
- Use the advice provided to know how and when to take a critical career decision.
- Improve the understanding of SCFHS processes and improve the communication between the attendees and the Commission.

COMMITTEES

ADVISORY COMMITTEE:

Dr. Saud Alturki	Vascular Surgeon – CEO Academy of Sciences & Chair of the HCPC Conference
Dr. Ziad Nakshabandi	CEO of the National Centre for Health Workforce Planning, SCFHS
Dr. Saud Alomar	Chairman of paediatric local committee at the central region of the Kingdom, SCFHS Consultant
Dr. Norah Alsubaie	Trauma & acute care surgery consultant, King Saud University Medical City
Ms. Diana Skaff, DBA(c)	Consultant Management and Academic Affairs, Academy of Sciences
