CONFERENCE

The background features a large, abstract circular design. It consists of several concentric rings. The left side of the circle is composed of multiple overlapping light blue rings. The right side is composed of multiple overlapping light green rings. The rings are not perfectly circular, creating a sense of movement or a stylized 'C' shape. The center of the image is a plain white space where the text is located.

Zero to One

mRNA

CGG AAG UGA CGG UAG UGA UCU AGU ACA

Ionizable Cationic Lipid

- Binds & Protects RNA
- Facilitates Endosomal Escape
- Neutral Charge at pH 7.4

Cholesterol

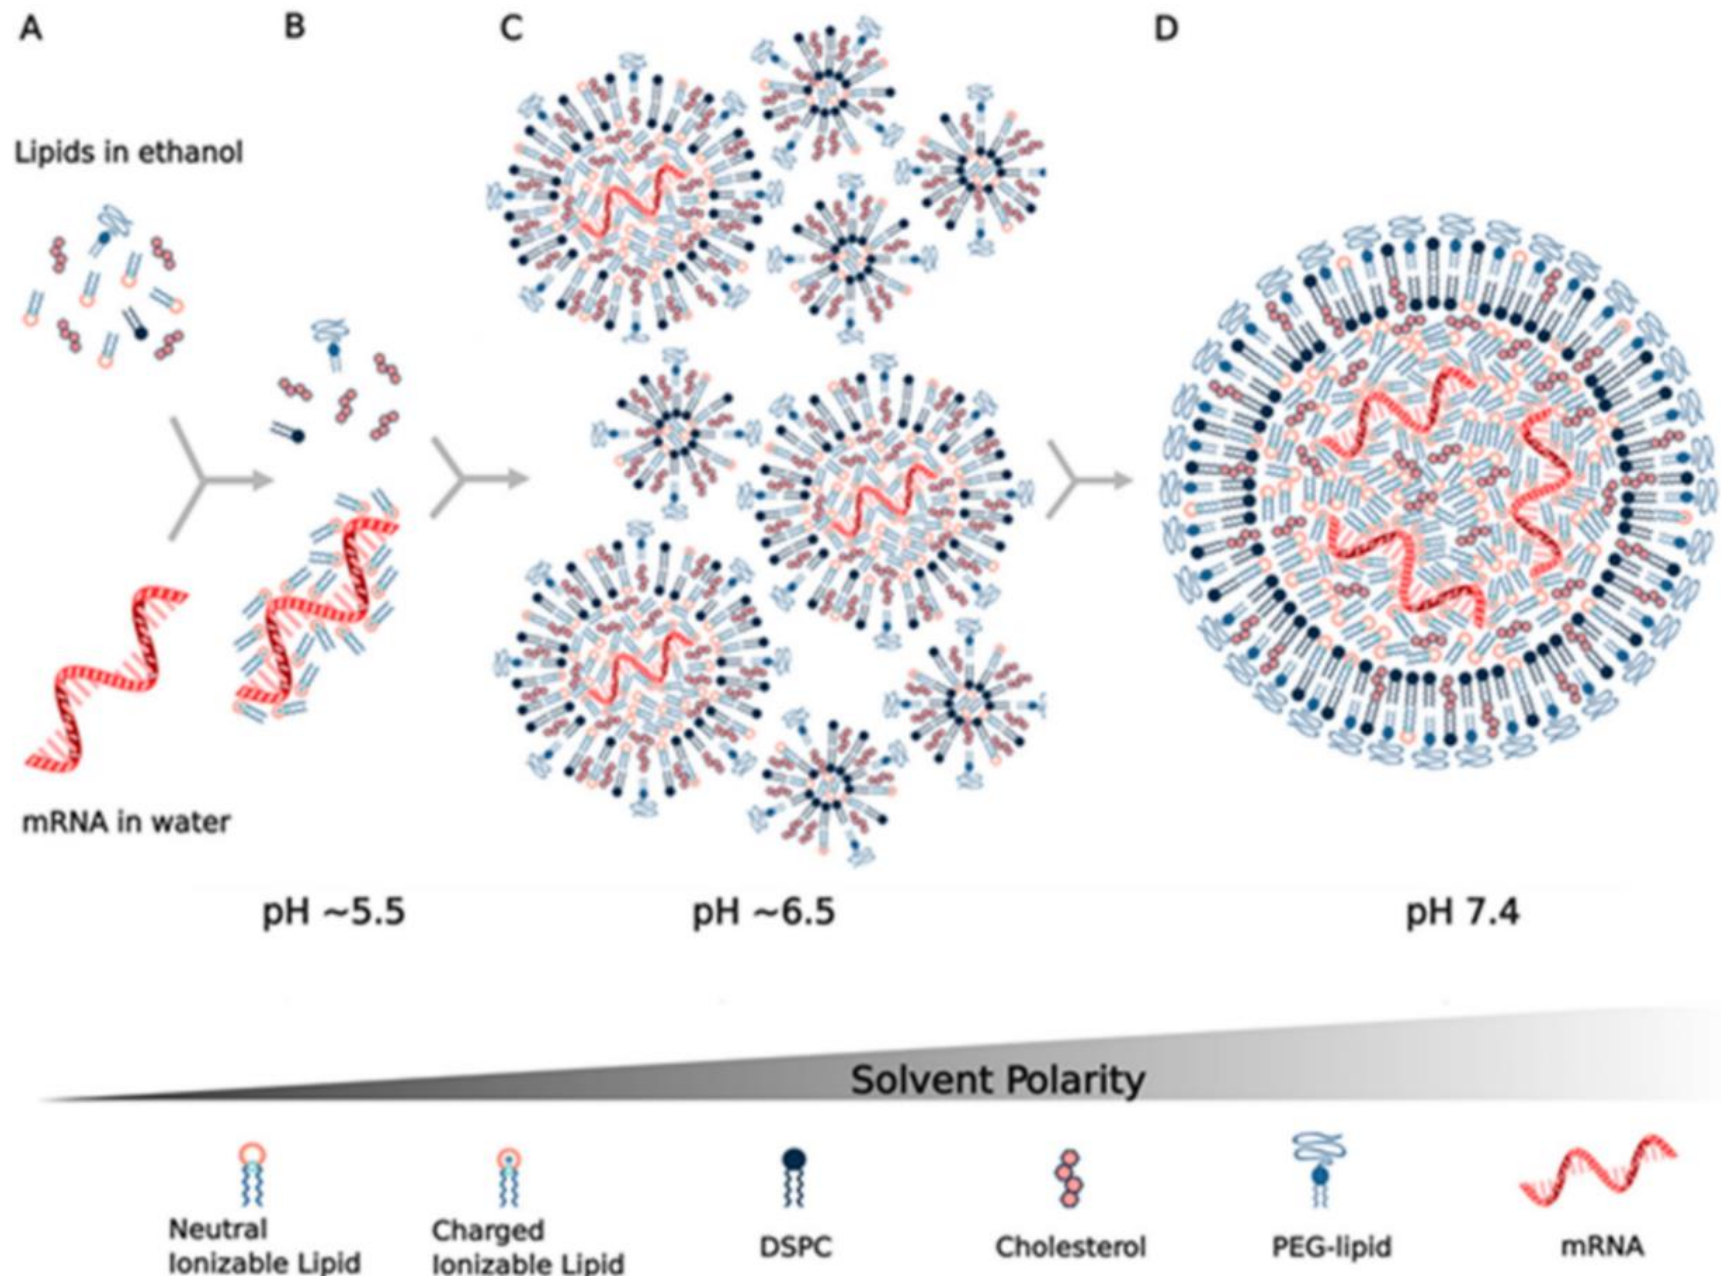

- Important for endocytosis via LDL receptor and ApoE

Helper Lipid

- Structural

Stabilizer

- Stabilizes Particle
- Protect from opsonization
