ASCN UK

Chairperson's
Welcome

Welcome to the ICC in Wales, a brand new facility which we feel we have been intrinsically linked with over the past few months! This included a hard hat site visit which was somewhat daunting as there was so much left to do! However, all the assurances have come to fruition and we feel welcomed and honoured to be here. We have an exciting programme lined up which I hope will inspire you to continue with the excellent work you all do and take us forward into another challenging year.

A huge thank you goes to each and every one of you who submitted your exceptionally high standard of abstracts this year. ASCN UK committee are indebted to your contribution, it was a really tough job yet again to short list and fit as many of them as possible into the programme. It is the essence of sharing your innovative and evolving practices which we believe makes the ASCN UK conference so unique, a "Specialist conference for you, determined by you as the specialists".

I hope that as we all constantly aim to improve patient outcomes and raise the profile of Stoma Care within these ever challenging times, the sharing of ideas, networking and establishing professional links over the next 3 days will deliver the message of our theme this year 'Getting the Balance Right'. The balance can be reflected in so many aspects of our work, from clinical to professional, work life to home life and many others which I am sure we can address together over the next 3 days.

Our keynote speakers have been invited specifically to share their expertise and experience which will add to our existing knowledge so that we are able to inform our local practice to improve patients' experiences. Enhanced relationships lead to stronger bonds which have a positive impact upon outcomes. Intelligent relationships allow us to change the way we deliver and manipulate those bonds so that we are able to embrace technology and innovation in ways which promote a more sustainable arrangement for our patients.

I look forward to meeting as many of you as possible again this year, hearing about your challenges and aiming to establish a balanced perspective so that together we can make the 2019 conference as engaging and enjoyable as we can.

General Information

Awards
The winner of the following awards will be announced on Monday 16th September in Room 1 from 16:50:

- New Presenters Award 2018 (supported by Coloplast)
- Stoma Care Nurse of the Year Award 2018 (Supported by SALTS)
- Urostomy Research Awards 2018 (Supported by Urostomy Association)
- ASCN UK Chairpersons Award - New For 2019

The winners of the following awards will be announced in the last session of the conference on Tuesday 17th September in Room 1 from 14:45:

- ASCN UK Overall Oral Presentation Award
- ASCN UK Poster Award

Certificate of Attendance
A Certificate of Attendance will be emailed upon the completion of the Conference Feedback Survey which will be sent to all participants after the end of the conference. Oral and Poster Presentation certificates will be sent upon request.

CPD Certified
The Conference has been awarded CPD Points from the CPD Certification Service. You will be awarded 1 CPD point for each hour of the Conference. It is the responsibility of the individual attending or undertaking any CPD activity to evaluate for themselves the learning benefit gained and then to record this in line with the membership or CPD requirements of his or her professional body or employer organisation.

Cloakroom
There will be a cloak room available free of charge for delegate's use and is in the Atrium close to registration.

Conference Etiquette
Mobile phones should be switched off or placed on 'silent' during sessions. Please also respect speakers and other delegates and refrain from talking during presentations.

Conference App
The conference app is a quick and easy way to find out information about the programme, view abstracts and further information about exhibiting companies. Via the app you may also contact fellow delegates directly, plan your event schedule and participate in live voting and Q&A.

To download and access the Conference App:

- Search for EventsAir in App Store or Google Play Store to download for IOS and Android Devices.
- The Event App Code is: ascnuk2019.
- You will then be prompted to enter your email address (the one you used to register with) and your personalised app pin (this is located on the reverse of your badge)

If you have any issues accessing the conference app or have any questions, please visit the App Help Desk located in the Atrium by registration.

Exhibition
In order to keep registration fees to a minimum, it is important that we have the support of commercial organisations at the conference. Please take time to visit each of the stands in the exhibition hall and find out more about their involvement in Stoma Care.

The exhibition will be open during the following times:

Sunday 15th September
18.00 – 20.00

Monday 16th September
09.30 – 17.00

Tuesday 17th September
09.30 – 14.00

Please note the exhibition hall will be closed to all delegates during the AGM on Monday 16th September and we would ask all delegates to attend the AGM in Room 1.

Insurance
The conference cannot accept any liability for personal injuries or for loss or damage to property belonging to delegates, either during, or as a result of the conference.

Location Maps
Please see the inside back cover for a map of the ICC Wales

Message Board
There will be a notice board next to the registration desk for those wishing to leave messages or notifications during the conference. Alternatively you can use the Conference Mobile App to send in app messages to delegates, speakers, exhibitors and committee members.

Photographer
An independent photographer will be taking pictures throughout the conference including photos of all the speakers and social events. These will be available following the conference. Should you not wish to be included in any of the photographs, please advise the team at the Registration Desk of this.

Posters
The Posters will be available for viewing throughout the conference. These will be located in the exhibition hall.

New for 2019

ASCN UK have introduced a dedicated poster session walk as part of the main programme, this will take place on Tuesday 17th September 2019 from 11.00am and 11.55am, you will have been pre-allocated a session to attend.

Case Study	P-1 – P-6
Clinical	P-7 – P-10
Education	P-11 – P-15
Patient Experience	P-16, P-17 & P-27
Political	P-18
Research/ Product Evaluation	P-19 – P-23
Service Development	P-24 – P-26

Raffle

This year's raffle proceeds will be donated to support Colostomy UK, Ileostomy & Internal Pouch Association (IA) and Urostomy Association (UA) and tickets will be on sale throughout the conference and conference dinner.

A range of fantastic prizes will once again be donated by our Industry Partners and the winning numbers will be displayed on the message board beside the registration desk during the morning tea/coffee break on Tuesday 17th September. If prizes are not claimed by the end of lunchtime on Tuesday 17th, then the prize will be redrawn and the revised winning ticket number will be updated on the Message Board.

Registration Desk

All delegates will receive their name badge, conference documents, and all relevant conference information upon arrival at the conference.

ASCN UK have taken the decision to make the conference more sustainable and one of the many steps towards this is not be providing delegate bags.

The Registration Desks will be open at the following times:

Sunday 15th September
14.00 – 20.30

Monday 16th September
07.00 – 17.30

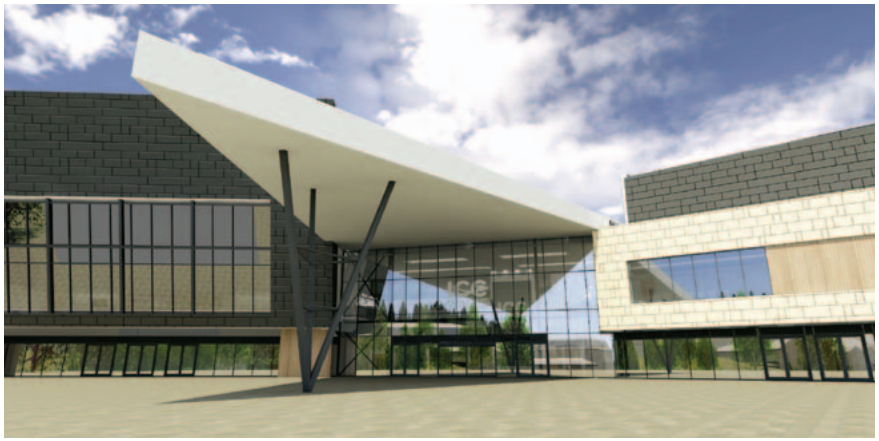
Tuesday 17th September
07.00 – 15.30

Delegates are requested to wear their badges at all times otherwise access to the building and sessions will be refused.

Speaker Preview

This is located in Room 5, which is on the first floor a short walk from the Registration. All presenters are required to check in their presentation a minimum of 4 hours prior to their talk or ideally, the day prior if possible.

The Speaker Preview Room will be open at the following times:



Sunday 15th September
14.00 – 18.00

Monday 16th September
07.30 – 17.30

Tuesday 17th September
07.30 – 13.30

Tea/Coffee Breaks and Lunch Arrangements

Catering points will be located in the exhibition hall. If you have requested a special diet at the time of registering, please advise a member of the catering team who will direct you to the Special Diets section. Vegetarian diets will be accommodated on the main buffet stations.

The ICC Wales is opening with the view to being an environmentally, sustainable venue and as a result of this they are not promoting the use of single use plastic throughout the venue. There are water stations located around the venue which you will be able to refill a reusable water bottle, please make sure and collect your ASCN UK water-bottle from registration.

Tweeting

We invite you to join in with the conversations taking place during ASCN UK on Twitter. Please use #ASCNUK2019

Wi-Fi

There is a complimentary Wi-Fi connection open to ASCN UK attendees, and details of how to access this can be found in the Conference App and at Registration.

'Getting the Balance Right'

Sunday 15th September		Location
14.00 – 19.30	**Registration & Speaker Preview Open**	Atrium
15.30 – 16.30	**Complex Case Study Seminar** *Dr Gabrielle Thorpe, Lecturer in Colorectal & Stoma Care Nursing, University of East Anglia* *Ms Sharon Fillingham, Psychosexual Therapist, University College London Hospitals* *Dr Marc Williams, Clinical Psychologist, Cardiff And Vale NHS UHB*	Room 2D
16.45 – 17.45	**Specialist Surgical Rotational Workshop** (ACE; Mitrofanoff & Nephrostomy) *Mrs Liz Davis, Urology Stoma/ Continence CNS, Hollister UK* *Ms Yvette Perston, Functional Bowel CNS, Queen Elizabeth Hospital Birmingham* *Kim O'Keeffe, Urology CNS, Queen Elizabeth Hospital Birmingham*	Room 2E
18.00 – 20.00	**Welcome Reception and Official Opening of the Exhibition**	Main Hall D
18.30 – 18.45	**Spotlight Session 1 – Clinimed**	Stand 10
18.50 – 19.05	**Spotlight Session 2 – Coloplast**	Stand 2

Monday 16th September		Location
07.00 – 17.30	**Registration & Speaker Preview Open**	Atrium
07.30 – 08.30	**Clinimed Breakfast Symposium** *Getting the balance right – Driving positive outcomes for peristomal skin*	Room 2E
07.30 – 08.30	**Salts Healthcare Breakfast Symposium** *Robotic Cystectomy; Is it the future?*	Room 2D
08.45 – 10.15	**Session One: Raising the profile and impact of stoma care** *Chair: Angie Perrin, ASCN UK Vice Chair*	Room 1
08.45 – 09.00	**Welcome to ASCN UK Conference 2019 & ICC Wales** *Maddie White, Chair of ASCN UK* *ICC Wales Representative*	

Monday 16th September – Continued		Location
09.00 – 09.10	**K-1 Opening Keynote** *Professor Jean White - Chief Nursing Officer for Wales/ Nurse Director NHS Wales*	
09.10 – 09.20	**Welsh Stoma Care Nurse 'Welcome to Wales'**	
09.20 – 09.40	**K-2 Implications of Robotic Cystectomy for the Specialist Nurse** *Mr David Mak, Consultant Urological Surgeon & Mrs Jenny Akins, Urology Advanced Nurse Practitioner, Royal Wolverhampton NHS Trust*	
09.40 – 09.45	**Q & A**	
09.45 – 10.55	**O1 - 'I'd rather die than have a bag'- challenging the stigma in 2019** *Natasha Rolls*	
09.55 – 10.05	**O2 - "Home when Stoma Nurse Happy"** *Anna Moseley*	
10.05 – 10.10	**Q & A**	
10.10 – 11.00	**Tea / Coffee / Exhibition / Posters**	Main Hall D
11.00 – 12.30	**Session Two: Research Development** *Chair: Jackie McPhail, ASCN UK Secretary*	Room 1
11.00 – 11.20	**K-3 IBD Surgery and the Stoma Nurse** *Mr Gethin Williams, Consultant Colorectal Surgeon, Royal Gwent Hospital, Newport*	
11.20 – 11.25	**Q & A**	
11.25 – 11.35	**O3 - The PROPHER study – Patient Reported Outcomes after Parastomal Hernia Treatment** *Sue Blackwell & Amanda Gunning*	
11.35 – 11.45	**O4 - Can early use of support wear garments reduce the risk of parastomal hernia?** *Andrew Bird*	
11.45 – 11.55	**O5 - Association between support garment use and quality of life in patients with a stoma: An exploratory cross-sectional study.** *Andrea Swarbrick-Brown*	
11.55 – 12.05	**O6 – Prospective evaluation of early complications after elective loop ileostomy** *Simon Turley*	
12.05 – 12.15	**O7 - Stoma care nurses and charities: working together to support patients in the community** *Richard Biddle*	
12.15 – 12.20	**Q & A**	
12.20 – 13.10	**Lunch / Exhibition / Posters**	Main Hall D

ASCN UK

Monday 16th September – Continued		Location
13.10 – 14.50	**Session Three: Supporting Clinical Nurse Specialists Development** *Chair: Maddie White, ASCN UK Chair*	Room 1
	New Presenters Award (Supported by Coloplast)	
13.10 – 13.20	**O8 – Colostomy Irrigation - What is the real impact on Quality of Life?** *Ambra Betinara*	
13.20 – 13.30	**O9 – Late to the Party- Promoting early introduction to the Stoma Care Team and referrals for Stoma Counselling for IBD patients.** *Sarah Hoskin*	
13.30 – 13.35	**Q & A**	
13.35 – 13.50	**K-4 Jean Preston Commemorative keynote:** **UEA/ASCN UK Advanced Stoma Care online module: up and running** *Dr Gabrielle Thorpe, Lecturer in Colorectal & Stoma Care Nursing, University of East Anglia*	
13.50 – 13.55	**Q & A**	
13.55 – 14.30	**Getting the Balance Right to raise the profile of stoma care - ASCN UK Annual General Meeting** *(Exhibition Closed)*	
14.30 – 14.45	**K-5 Update from BHTA** *BHTA Representative*	
14.45 – 14.50	**Q & A**	
14.50 – 15.30	**Tea / Coffee / Exhibition / Posters**	Main Hall D
15.30 – 17.00	**Session Four: Specialist Practice** *Chair: Wendy Osborne, ASCN UK Education Officer*	Room 1
15.30 – 15.50	**K-6 Global Best Practice Guidelines for Neonates, Children, and Teenagers** *Mrs Claire Bohr, Paediatric Stoma and Bowel Management Nurse Specialist, Bristol Royal Hospital for Children*	
15.50 – 15.55	**Q & A**	
15.55 – 16.05	**O10 - Future Imperfect - The Impact on Families When A Child is Born with Anorectal Malformation** *Erica Thomas*	
16.05 – 16.15	**O11 - The Management and dilemmas of a preterm baby, with 2 stomas, and a parent with learning difficulties** *Elaine Cronin*	
16.15 – 16.25	**O12 - Only one of me - a love letter from mum** *Hazel Brooks*	
16.25 – 16.35	**O13 – Who Do You Call?** *Sophie Page*	
16.35 – 16.40	**O14 – Research: Journey of Discovery and Tool for Change** *Michelle Boucher*	
16.45 – 16.50	**Q & A**	

Monday 16th September – Continued		Location
16.50 – 17.00	**2019 AWARD PRESENTATIONS** **Announcement of Chairperson Award (ASCN UK)** **Announcement of Winner of New Presenters Award 2019 (COLOPLAST)** **Announcement of Winner of Nurse of the Year Award 2019 (SALTS Healthcare)**

14.45 – 14.55	**ASCN UK Award Presentations** **ASCN UK Overall Conference Presentation Awards** **ASCN UK Poster Presentation Awards**	Room 1
14.55 – 15.00	**Close of Conference** *Maddie White, ASCN UK Chair*	Room 1

Keynotes & Invited Speaker Biographies

Mrs Jenny Akins, Urology Advanced Nurse Practitioner, Royal Wolverhampton NHS Trust

Qualified as a registered nurse in 1999 and her first posting was on a urology ward. In 2001 was appointment as senior staff nurse and assisted with the development of the urology Hospital at Home team. Worked on a rotation system on the ward and urology Hospital at Home team for a further 2 years. Then began working with the urology Advanced Nurse Practitioner's in 2003. Initially this was a secondment post, soon after was made a permanent member of the team. Since then Jenny has continued to develop her skills, knowledge and education studying at both degree and masters level. Since qualifying she has always had a special interest in bladder cancer and wanted to improve the support and care offered to this group of patients. Jenny trained as a stoma nurse in 2004 to ensure patients requiring cystectomy surgery were offered continuity of care and ongoing support. In 2009 Jenny commenced extensive training with the urology consultants to develop as a nurse cystoscopist.

Mrs Claire Bohr, Paediatric Stoma and Bowel Management Nurse Specialist, Bristol Royal Hospital for Children

Claire has worked in the specialist field of paediatrics for over 30 years with 15 years' experience in Paediatrics Stoma and Bowel Management.

She was awarded the Nursing times Continence Award in 2008 for work undertaken in developing a Paediatric Bowel Management programme.

Claire is an active committee member for the Paediatric Stoma Nurse Group UK working with the group to produce literature such as Stoma Care in schools And Nurseries that has been used nationally and internationally to support paediatric stoma care.

She has presented at national and international level and has worked with industry in the development of specialised Paediatric products and literature.

Over the last year she has been working with a group of 7 nurses in the Global Paediatric Stoma Nurse Advisory Board (GPANAB) to develop the Global best Practice Guidelines.

Mrs Julie Cornish, Colorectal Consultant, Cardiff And Vale University Health Board

Julie is a Colorectal Consultant Surgeon in the University Hospital of Wales, Cardiff. Has been a consultant since 2015, following completion of her subspecialty pelvic floor surgical training in Oxford. Julie trained in Wales and London and completed a MD in 2011 from Imperial College, London. Now specialising in colorectal cancer and pelvic floor surgery.

Julie's research interests are colorectal cancer and bowel dysfunction that can result from this as well as injury from childbirth. Julie has published more than 40 publications and presented nationally and internationally.

Mrs Liz Davis, Urology Stoma / Continence CNS, Hollister UK

Liz has worked within the urology speciality since 1990 covering a number of differing roles. Liz has a particular interest in functional urology and stoma care and for the past 15 years has worked as a clinical nurse specialist in this area. In 2015 she joined Hollister as a company nurse and moved to a neighbouring urology centre in Sunderland but still in her native North East.

Liz is passionate about raising the profile of urology patients in the field of stoma care as they are often overlooked.

Included in this group of patients are those with nephrostomies who are increasingly discharged from acute settings into the community with complex care needs that are often not addressed or understood.

Ms Sharon Fillingham, Psychosexual And Gender Therapist, University College Hospital London

Sharon has been working in the field of Urology since 1978. Whilst a ward sister Sharon qualified as a stoma care nurse and now works as a Urinary Diversion CPF (Clinical Practice Facilitator) and Psychosexual and Gender therapist at UCLH. Her NHS role involves teaching nurses who are caring for individuals having bladder reconstructive surgery.

As a ward sister she became concerned that patients who were undergoing surgical procedures for gender issues, fertility and sexual function, received little or no counselling. This led her to train as a counselling therapist. She studied for her MSc in Human Sexuality. Sharon

works part time as a Psychosexual therapist in the NHS and as a Gender Therapist in the private sector.

Sharon is nurse advisor for the Urostomy Association and Mitrofanoff Support.

Co- editor of Urological Nursing: 2nd and 3rd Editions

Mr David Mak, Consultant Urological Surgeon, Royal Wolverhampton NHS Trust

Mr David Mak is a Consultant Urological Surgeon at New Cross Hospital, Wolverhampton. He has a subspecialist interest in prostate and bladder cancer. He has experience in utilising robotic surgery as well as open surgical approaches in the management of such malignancies.

Ms Kim O'keeffe, Urology CNS, Queen Elizabeth Hospital Birmingham

Kim has been a urology oncology CNS for 20 years, with a special interest in bladder cancer. She manages all of the high risk NMIBC, delivering intravesical treatments (cytotoxic and immunotherapy), running her own flexible cystoscopy list.

Kim also cares for the radical cystectomy patients undergoing either urinary diversion or neobladder reconstruction and also manages the flexible cystoscopy unit at UHB.

Ms Yvette Perston, Functional Bowel CNS, Queen Elizabeth Hospital Birmingham

Yvette Perston trained in Cardiff qualifying in 1983. She became a surgical ward sister in 1985 in Swansea, on a gastrointestinal and vascular ward. In 1989 she became a stoma care nurse covering 3 DGHs and the county of West Glamorgan with a colleague. In 1994 she moved back to Cardiff to set up a colorectal department at Llandough University Hospital. During 18 years in Cardiff she established a Colorectal Nursing department which provided inpatient; outpatient and community care for patients with colorectal problems. She has been the Functional Bowel CNS at the Queen Elizabeth Hospital Birmingham for the last 6 years.

Dr Terri Porrett, Head of Education, Coloplast

Terri was a ward sister at St. Marks Hospital before joining the Homerton University Hospital NHS Foundation Trust in 1991 as a CNS in Stoma Care. Terri worked at the Homerton as a Nurse Consultant and was Clinical Director of the North East London Bowel Cancer Screening Centre. She has co-edited two textbooks and published extensively in medical Colorectal and nursing Gastrointestinal Journals.

Terri joined Coloplast in 2011 and in her role as Head of Education, Ostomy Division, develops professional support and education programmes for specialist nurses. Terri was involved in the development of www.apollonursingresource.com, an online resource to enable specialist nurses to articulate the value of their role and amplify the voice of specialist nurses. Utilising the Apollo Nursing Resource website and social media, Terri is focussed on disseminating information to ensure specialist nurses are able to demonstrate their value and articulate the complexity of their role and services.

Dr Gabrielle Thorpe, Lecturer in Colorectal & Stoma Care Nursing, University of East Anglia

Gabby is a Lecturer in Colorectal & Stoma Care Nursing at UEA, Norwich, and module organiser for the level 7 online Advanced Stoma Care module, developed in close collaboration with ASCN (UK). Gabby is a Fellow of the Higher Education Academy and her teaching and research interests are largely based around qualitative research and colorectal surgical care. Gabby is a Trustee of the Bowel Disease Research Foundation, Deputy Chair of the Association of Coloproctology of Great Britain & Ireland (ACPGBI) Nurse's group (ACPN) and nurse representative on the ACPGBI Research & Audit Committee. She has been a stoma care specialist nurse for 22 years and continues to work clinically in stoma care for two days each month.

Professor Jean White, Chief Nursing Officer For Wales/ Nurse Director NHS Wales, Welsh Government

Prof Jean White CBE MStJ was appointed as Chief Nursing Officer for Wales in October 2010. Welsh by birth, she trained as a general nurse in Swansea and practised as a theatre nurse in Wales and London. Jean has held positions in nurse education, at the Welsh National Board, Health Professions Wales and Welsh Government. Jean has worked with a number of European Governments and is currently an expert adviser to WHO European Region.

Since appointment as CNO her main priority has been on developing the nursing and midwifery workforce in Wales and is currently engaged in implementing the Nurse Staffing Levels (Wales) Act 2016.

Jean is an Honorary Visiting Professor to the School of Nursing and Midwifery Studies, Cardiff University, Visiting Professor to University of South Wales, Fellow of Swansea University, Fellow of Bangor University and was made Fellow of the Queen's Nursing Institute in November 2016. She was acknowledged in the inaugural Nursing Times Nurse Leaders 2014 list. She was awarded a CBE in the 2017 Queen's Birthday's Honours list and became a Member of the Order of St John in 2018.

Mr Gethin Williams, Consultant Colorectal Surgeon, Royal Gwent Hospital, Newport

Gethin has been a consultant colorectal surgeon at the Royal Gwent Hospital Newport since 2008. He was a laparoscopic colorectal fellow to Prof Pete Sagar at Leeds prior to starting his consultant post. He has a busy cancer and inflammatory bowel disease practice.

Dr Marc Williams, Clinical Psychologist, Cardiff And Vale NHS UHB

Marc is a clinical psychologist in an intestinal failure service (University Hospital of Wales) and a senior academic tutor at Cardiff University. He works with inpatients and outpatients who are receiving parenteral nutrition / have stomas, and provides consultation to staff with respect to the psychological and emotional aspects of care.

K-2
Implications of Robotic Cystectomy for the Specialist Nurse

Mrs Jenny Akins
Urology Advanced Nurse Practitioner

Mr David Mak
Consultant Urological Surgeon, Royal Wolverhampton NHS Trust

Since its introduction in 2000, the adoption and advancement of robotic surgery have risen rapidly. Urology has been one of the specialties leading the use of robot-assisted technology in surgery. Robotic-assisted laparoscopic radical cystectomy (RARC) is increasingly being used in the management of bladder cancer. The robotic approach allows for intracorporeal urinary diversion techniques and has the reported advantages of decreased blood loss, decreased analgesic use, and shorter hospital stay.

Certain considerations from both the nursing and surgical perspective are taken into account when assessing patients for the robotic approach. Successful outcomes of robotic surgery rely on the close teamwork between the nurse specialist and surgeon.

We discuss the observed benefits of RARC and the key considerations from the views of the surgeon and nurse specialist.

K-3
BD Surgery and the Stoma Nurse

Mr Gethin Williams,
Consultant Colorectal Surgeon, Royal Gwent Hospital, Newport

Stoma nurses often encounter inflammatory bowel disease (IBD) in their everyday practice. It is not only the stoma that bothers the IBD patient. Apart from managing the stoma itself, the patient will also have other varied health issues, mainly relating to their individual IBD. The stoma nurse is often the confidante and first point of call of the IBD patient with a stoma; a knowledge of IBD is important for the stoma nurse to provide a holistic approach to the patient. Disuse proctitis, perianal Crohn's disease, ileoanal pouches and other relevant topics will be discussed.

K-4
Jean Preston Memorial Keynote: UEA/ ASCN UK Advanced Stoma Care online module: up and running

Dr Gabrielle Thorpe
Lecturer in Colorectal & Stoma Care Nursing, University of East Anglia

The first cohort of students undertook the UEA online level-7 Advanced Stoma Care module, developed in close collaboration with ASCN (UK), between January and July 2019. In this presentation, Dr Gabby Thorpe, module organiser, will provide an overview of the content and delivery of the module, including student evaluations from the first cohort and insights gained to inform the second run, in January 2020. Many experienced ASCN (UK) members have contributed to the module, along with significant numbers of patients and clinicians from affiliated disciplines.
Students taking this module have benefited from the vast breadth and depth of the experiences and perspectives shared in a way that would have been impossible to bring together in a taught module. This presentation aims to capture some of the unique qualities of the module and to demonstrate the value of the module in advancing stoma care practice.

K-6
Global Best Practice Guidelines for Neonates, Children, and Teenagers

Mrs Claire Bohr
Paediatric Stoma and Bowel Management Nurse Specialist, Bristol Royal Hospital for Children

The Global Paediatric Stoma Nurses Advisory Board (GPSNAB) have been working together for the last year to produce the Global best practice guidelines for Paediatric stoma care.

The guidelines were drafted by an international group of 7 paediatric stoma nurse specialists, from 6 countries lead by the project manager Louise Forest –Lalande from Canada. The group and guidelines are independent they are developed exclusively by the group This is the first of their kind in the world. and contain a lot of useful information about the care and management of these babies including psychosocial support for parents/carers.

The information is presented in two sections, the first section identifies the clinical aspects of paediatric stoma care highlighting the indications, Pathologies, and types of stomas found in Neonates, children and adolescents. These are supported with colour photographs for reference.

The second section focuses on the psychosocial aspects of care, with chapters on the emotional impact of stoma surgery on the child and family, and how to develop a therapeutic relationship to enable best practice.

The information was gained by the expert board of specialist nurses sharing many years of experience and knowledge. Many of the suggestions and recommendations are referenced with a supporting glossary and links to other resources.

The presentation is an insight into how the guidelines were developed, difficulties that were overcome, and how they can be used to support health care professionals in this specialist field.

K-7

Low Anterior Resection Syndrome - bowel dysfunction after rectal cancer surgery

Mrs Julie Cornish
Colorectal Consultant, Cardiff And Vale University Health Board

As surgeons become more aggressive in avoiding resection of the anus, and oncologic outcomes in malignant disease improve, a greater concentration has been placed on functional outcomes. It is assumed by many patients and providers that a restorative procedure to avoid a permanent stoma is preferable in terms of quality of life. However, up to 90% of such patients will subsequently have a change in bowel habit, including faecal incontinence, increased bowel frequency and emptying difficulties, which impact their physical and emotional function, and quality of life. Furthermore, up to 50% will experience severe bowel dysfunction on a long-term basis. Increasing awareness amongst clinicians of the cluster of bowel symptoms that can follow after rectal cancer surgery and the development of the LARS score from the group in Arhus, Denmark, has led to the use of the term LARS (Low Anterior Resection Syndrome). The aetiology of LARS is thought to be multifactorial, with the potential of sphincter injury during the construction of the anastomosis, alterations in anorectal physiology and the development of a pudendal neuropathy. The presence of a temporary ileostomy is associated with anterior resection syndrome. The use of a temporary ileostomy to cover a pelvic anastomosis following anterior resection for a mid to low anastomosis is now considered standard practice for most colorectal surgeons in the UK. Although these stomas are intended to be temporary, recent national bowel cancer audit data reports that only 65% are reversed within 18 months.

This talk will cover the risk factors for LARS, whether timing of ileostomy plays a role in bowel function and also treatment options that are available to patients.

K-8

Cultural norms and healthcare delivery are changing rapidly - Can stoma care services adapt to reflect these changes?

Dr Terri Porrett
Head of Education, Coloplast

In this presentation we will explore how mobile technologies have changed our personal behaviours. Reviewing the historical development and rationale for stoma care service provision, we will reflect on the daily challenges both health care professionals & service users face navigating the changing NHS.

Having identified the background environment in which we live and work, we will identify & discuss how changing DoH strategy potentially impacts on stoma care nursing service delivery. The many solutions that are available to us to embed new ways of working will be identified.

Discussion/Conclusion
The use of digital technologies, social media and web-based information is growing hugely within health and social care. Stoma Care services need to be visible and reflect the changing information seeking behaviours of patients and the environment in which we work.

Together we can ensure Stoma Care services, and the support and information we deliver, is safe, accessible, responsive and available to patients at whatever stage of their adaptation journey.

Workshop/Seminar Abstracts

Sunday 15th September 2019

15:30 – 16:30 **ASCN UK Complex case Seminar** **Room 2D**

Panel

Dr Gabrielle Thorpe, Lecturer in Colorectal & Stoma Care Nursing, University of East Anglia

Ms Sharon Fillingham, Psychosexual Therapist, University College London Hospitals

Dr Marc Williams, Clinical Psychologist, Cardiff And Vale NHS UHB

Overview:

This unique workshop will focus on a complex case study scenario – we will have a MDT approach with specialists from the fields of body adaptation, psychology and sexuality.

Learning Objectives:

- Identify advanced assessment skills to increase understanding and insight to uncover and recognise your patients' needs
- Challenge and evaluate your communication skills to assist in effectively managing complex patients
- Gain take away tools and advice to enhance your confidence and ability to manage challenging or complex situations

16:45 – 17:45 **ASCN UK Specialist Surgical Workshop** (ACE, Mitrofanoff & nephrostomy) **Room 2E**

Presenters

Mrs Liz Davis, Urology Stoma/ Continence CNS, Hollister UK

Ms Yvette Perston, Functional Bowel CNS, Queen Elizabeth Hospital Birmingham

Kim O'Keeffe, Urology CNS, Queen Elizabeth Hospital Birmingham

Overview:

A rotation of three separate interactional workshop stations focusing on: ACE, Mitrofanoff and Nephrostomy. An opportunity to hear from experts and share your experiences.

Learning objectives:

- Increase knowledge and understanding of each of these specialist procedures
- Evolve clinical confidence to manage the care of a patient who has undergone these procedures
- Share advice, hints and practical skills to address any concerns or challenges when caring for these patients

Exhibition Spotlight Session

Sunday 15th September 2019

18:30 – 18:45 **Clinimed:** Introducing UltraFrame	**Main Hall, Stand 10**

Join us on the CliniMed stand this Sunday, 15th Sept at 6.30pm to find out more about our ultra-thin, ultra-conformable film flange extender – UltraFrame. It's the thinnest flange extender in the world and we look forward to sharing the benefits this product can have to your patients. Look forward to seeing you there.

18:50 – 19:05 **Coloplast**	**Main Hall, Stand 2**

Making life Easier for people with intimate healthcare needs. That's our mission. Join us on stand number 2, where we will share two exciting developments that bring us closer to that end goal.

One is our new company overview, announced by our General Manager, Annemarie van Neck. This will give you a flavour of how we operate as an organisation, and how we strive to make everyday life easier for people with a stoma.

The second is a new resource, produced in collaboration with Maddie White, ASCN UK Chair 'Safe Digital Resources for Ostomates'. As Maddie White said 'As Stoma Care Nurses working in a digital age, we need to embrace new genres which will enable us to inform and support our patients effectively. These need to be reliable and accurate; there are many ways for patients to source information about stomas, surgery and products as well as adapting to life with a stoma, therefore a stoma resource guideline which has been approved and vetted, will give SCNs a safe starting place when offering online and digital support'.

It is not too soon to begin making plans to attend the **WCET® - ASCN UK 2020 Joint Congress** in

GLASGOW, SCOTLAND

Registration for the 2020 Joint Congress will open on **15 September 2019** with the following pricing structure:

Super Early Bird (15–30 September 2019): £280 (WCET® & ASCN UK members) | £330 (non-members)
Early Bird (1 October 2019–30 June 2020): £335 (WCET® & ASCN UK members) | £435 (non-members)
Standard (1 July 2020–31 August 2020): £375 (WCET® & ASCN UK members) | £475 (non-members)
Late (1 September 2020–Congress): £415 (WCET® & ASCN UK members) | £515 (non-members)
Daily: Early: £150 | Standard: £180 | Late: £220

Interested in presenting at the **WCET® - ASCN UK 2020 Joint Congress**?
The Congress Organising Committee invites WCET® and ASCN UK members and other interested authors/delegates to participate in the WCET® - ASCN UK 2020 Joint Congress programme by submitting an abstract for an oral presentation, poster presentation or either a poster or oral presentation beginning on **15 September 2019**. The abstract submission deadline is **29 February 2020**.

Please be sure to visit **www.wcet-ascnuk2020.com** to register, submit an abstract and for other special announcements. We can't wait to see you in Glasgow next year!

Breakfast Symposia

Monday 16th September 2019

07:30 – 08:30 **Clinimed: Getting the balance right – Driving positive outcomes for peristomal skin** — **Room 2E**

Presenters:

Pamela White (Intro & Chair) – Clinical Governance Manager, CliniMed & SecuriCare (Medical) Ltd

Mark Collier – Lead Nurse/Consultant – Tissue Viability, United Lincolnshire Hospitals NHS Trust

Dr Duale Mahdi – Research Scientist, Welland Medical Limited

Moira Evans- Product Development Clinical Lead, CliniMed Ltd. Honorary NHS Tissue Viability Nurse

Abstract:

Offering clinicians the opportunity to consider, challenge and consolidate their current practice. The symposium will present evidence relating to the clinical use of Manuka honey balancing academic, scientific and practical peristomal skincare. This discussion-based approach highlights a summary of available literature, incorporating:

- Introduction to the legacy of Manuka honey within skincare
- The scientific benefits related to peristomal skin management
- Patient experience and outcomes discussing the balance between experience and science

Appreciating the underlying challenges facing peristomal skin enables greater understanding and the need to balance natural skin defence with optimal skin flora, maintaining the skin equilibrium to provide improved patient outcomes.

Highlights of the symposium will include:

- Clinical review highlighting the importance of preserving the natural balance of skin flora
- Historical review of literature leading into the continued development and incorporation of Manuka honey within skincare regimes providing a scientific evidence base
- The combination of balancing patient needs and desired outcomes, through the discussion of patient experience following the introduction of Manuka honey into their stoma care regime

This symposium intends to provide Clinical Nurse Specialists with a balanced approach to the underpinning clinical and scientific evidence supporting the use of Manuka Honey; to facilitate peristomal skin assessment and decision making, ultimately leading to positive patient outcomes

07:30 – 08:30 **Salts Healthcare: Robotic Cystectomy; Is it the future?** — **Room 2D**

Presenter:

Mr Dan Wilby BM FRCS(Urol), Consultant Urological Surgeon and Lead for Urological Cancer, Queen Alexandra Hospital, Portsmouh

Abstract:

Robotics in surgery is a fast evolving and developing field and, in recent years, specialist centres have explored the use of surgical robots to carry out more and more complex procedures. Radical cystectomy is one such procedure, but what are the benefits and should it replace open surgery?

Tuesday 17th September 2019

07:30 – 08:30	**Coloplast: Patient assessment and formalised clinical documentation – Exploring the implications for practice using guidelines from a global Consensus**	**Room 2E**

Abstract:

This interactive breakfast symposium will explore the everyday challenges of documenting the expert SCN clinical assessment, treatment plan and patient outcomes.

We will share the outcomes from an international Ostomy Consensus on practice guidelines for documenting stoma assessments.

These Consensus practice guidelines are the result of a large-scale Modified Delphi Consensus-Building Process, the six-month process included a literature review, a series of on-line surveys, face-to-face workshops, virtual dialogues and a professionally facilitated large group discussion process. Over 1600 ostomy care nurses across 27 countries were involved in the consensus development of the Guidelines.

The Consensus Guidelines include 9 statements on how to assess peristomal body profile, how to engage and educate patients and when to follow-up patients after hospital discharge or product change.

Throughout this symposium we will learn from UK SCN's who took part in the process and identify the key implications for practice and documentation in the UK. The tools and guidelines discussed within this Symposium will allow SCN's to standardise professional documentation, save time and have quantifiable data to demonstrate the cost effective and cost-efficient value of their expertise and service.

07:30 – 08:30	**Open Mic Clinical Case Studies by ASCN UK**	**Room 2D**

Facilitators: **Miss Angie Perrin**, ASCN UK Vice Chair
Mr Kevin Hayles, ASCN UK Area 12 Representative

An excellent opportunity for you to discuss any challenging situations in stoma care with your peers. Sharing of advice and experience within the group (what pouch, lotion, potions and/or additional products were used) generates an interactive discussion and offers possible solutions.

Poster Presentations

Case Study

P-1 Lipofilling: an unusual solution to pouch leakage secondary to deep peristomal skin creases

P-2 PG or not PG

P-3 A case study demonstrating the cooperation and collaboration needed to improve patient outcomes with a Nicorandril ulcer and magnesium deficiency.

P-4 Guidance for ward nurses and patients to manage a complex Enterocutaneous Fistula (ECF)

P-5 case study exploring the benefits of trans-anal irrigation to treat chronic constipation

P-6 Balancing stoma complexities with pouch convexity – a review of one patient's journey through peristomal skin complication management

Clinical

P-7 High Stoma Output Management. A simple guide.

P-8 Low output stomas

P-9 Getting the balance right with Clinical Respect

P-10 Peristomal skin issues: balancing patient needs with improved skin integrity outcomes

Education

P-11 RCN Guidelines update Management of lower bowel dysfunction including Digital rectal examination and digital removal of faeces

P-12 LearnPro Module Stoma Care

P-13 A carer's guide to changing a child's stoma bag (poster)

P-14 Getting the balance right between specialist stoma nurse input and upskilled ward staff: How can we achieve this in order to improve patient outcomes?

P-15 The ACE Procedure. An Information Poster.

Patient Experience

P-16 Rambling with An Ileostomy

P-17 The Importance of Faith in Stoma Care

P-27 Hidden baggage! – IA & Colostomy UK Bursary Winner

Political

P-18 Responding to Brexit

Research/Product Evaluation

P-19 Experiences of support garments following bowel stoma formation: analysis of free-text responses in a cross-sectional survey

P-20 Evidence from a UK Multi Centre Evaluation of a Soft Convex Barrier Formulated and Designed to Buffer pH from Stoma Output

P-21 Assessing Quality of Life of Ostomates at Moi Teaching and Referral Hospital in Eldoret Kenya.

P-22 Adhesive Remover Spray- Balancing the Books and Patient Satisfaction

P-23 Improving patient confidence with Brava Tape XL, a proven cost effective solution.

Service Development

P-24 Stoma Care in the Prison setting. An illustration of the considerations to be made when providing stoma care in the prison setting and the measures taken to ensure optimum care is provided."

P-25 Patient Satisfaction Questionnaires to assess community referral pathways are achieved in a timely manner promoting a quality service.

P-26 Integrated Working Improves Adult Ileostomy Management

Web: www.auraclothingmystory.com
Stand: 20b

Aura Clothing is a new brand that focuses on creating custom garments for those living with an ostomy. The garments are created and developed through the passions and personal experiences of its founder who has had an ileostomy since the age of 13. Her passions for unique design and helping others brought the vision, and these products to life.

Our products bring together the finest materials, purposeful design and glamour to meet the needs of ostomates who want products that are both unique and beautiful. We believe in quality, care, and creating sustainable and ethical products that you can enjoy.

We are motivated by the women and men who struggle to wear everyday clothing due to their ostomy, tubes, scars, hernias, stretch marks or even those who are uncomfortable with their abdominal region.

Our aim is to create and produce high quality garments with functional detail that not only see you through the coming seasons but items that will be worn for years to come.

British Journal of Nursing
British Journal of Nursing (BJN) is the leading general clinical journal for nurses. Authoritative, accessible and diverse, it's an essential read for everyone from students to specialists.

Twenty-two times a year, BJN publishes up-to-date clinical reviews, original research and evidence-based papers, written by experts and reviewed by prominent authorities in the nursing profession. In addition, the journal publishes up to 17 themed supplements a year, providing even more in-depth clinical information on areas such as stoma, continence and wound care. The Journal also publishes the ASCN UK stoma supplement 3 times a year within the journal; the official publication for the ASCN UK.

Gastrointestinal Nursing Journal
Gastrointestinal Nursing is the only UK journal for nurses working in gastrointestinal and stoma care. It covers all aspects of gastroenterology, with stoma care being a key topic of interest for the publication; content is published in each edition within the journal around stoma care.

Publishing up-to-date comment and opinion, peer-reviewed clinical and research papers, guidance on clinical skills and examining issues affecting careers and professional development, Gastrointestinal Nursing is the best journal for nurses working in this specialty.

Address: Southampton Children's Hospital,
Tremona Road
Southampton
SO16 6YD
Email: info@psng.co.uk
Web: www.psng.co.uk
Stand: 4

The Paediatric Stoma Nurse Group (PSNG) is a collection of nurses spread all over the country. Members are made up of neonatal, paediatric and adult stoma nurses and neonatal and paediatric surgical nurses. All of us care for neonates or children with stomas on a day to day basis.

Based in hospitals and in the community we are there to provide support for children and their families before, during and after formation of a stoma. Many of us continue to provide support for these children even when their stomas have been closed. Specialising in the management of continence.

Purple Wings Charity

Web: www.purplewingscharity.com
Stand: 26

Our charity helps sufferers of IBD with ostomies regain confidence and self-esteem through our 'Time for me grants' and events.

Our grants pay for sufferers, their families and loved ones to get together and do something as simple as a day out, romantic break, family mini holiday etc all in the name of building confidence as so many shut themselves away after stoma surgery. Once they have had their grant they feel empowered to be able to do the small things – like going to the park with their children or going out for a date night. We need to start counting all the wonderful things we can do rather than focusing on negatives. PW strives to help sufferers to have this mantra. We also hold events where IBD ostomates can get together to have a great time whether it be on our annual spa break, summer ball, karting events etc. The bi-product is that these people inevitably talk about their experiences and feel less alone. This is a huge confidence boost in itself. In particularly, I remember at the spa break and 10 ladies with bags got together and we were discussing swim wear and we all decided to wear low rise bikinis and giggled at the thought of so many of us being together and standing tall with our ostomies. PW is a positive charity and is helping people daily.

Respond Healthcare

Contact: Nicola Spencer
